Since the publication of the still very valuable Biblioteca histórica de la filología by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600 (BICRES) began appearing in 1994. BICRES I covered the period from the early beginnings to 1600), followed by BICRES II (1601–1700), BICRES III (1701–1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the Spanish language.

Drawing on a Gramscian theoretical perspective and developing a systematic comparative approach, The Civic Foundations of Fascism in Europe challenges the received Tocquevillian consensus on authoritarianism by arguing that fascist regimes, just like mass democracies, depended on well-organised, rather than weak and atomised, civil societies. In making this argument the book focuses on three crucial cases of interwar authoritarianism: Italy, Spain and Romania, selected because they are all counterintuitive from the perspective of established explanations, while usefully

demonstrating the range of fascist outcomes in interwar Europe. Civic Foundations argues that, in all three cases, fascism emerged because of the rapid development of voluntary associations, combined with weakly developed political parties among the dominant class, thus creating a crisis of hegemony. Riley then traces the specific form that this crisis took depending on the form of civil society developed (autonomous, as in Italy; elite-dominated, as in Spain; or state-dominated, as in Romania) in the nineteenth century.

This book applies recent theoretical insights to trace the development of Castilian and Latin American Spanish from the Middle Ages onwards, through processes of repeated dialect mixing both within the Iberian Peninsula and in the New World. The author contends that it was this frequent mixing which caused Castilian to evolve more rapidly than other varieties of Hispano-Romance, and which rendered Spanish particularly subject to levelling of its linguistic irregularities and to simplification of its structures. These two processes continued as the language extended into and across the Americas. These processes are viewed in the context of the Hispano-Romance dialect continuum, which includes Galician, Portuguese and Catalan, as well as New World varieties. The book emphasises the subtlety and seamlessness of language variation, both geographical and social, and the impossibility of defining strict boundaries between varieties. Its conclusions will be relevant both to Hispanists and to historical sociolinguists more generally.

This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.
