Census, Child Welfare and Compulsory Education Bureaus, Established 1917 Haynes Publishing Master Qt's Most Powerful APIs, Patterns, and Development Practices

Qt has evolved into a remarkably powerful solution for cross-platform desktop, Web, and mobile development. However, even the most experienced Qt programmers only use a fraction of its capabilities. Moreover, practical information about Qt's newest features has been scarce—until now. Advanced Qt Programming shows developers exactly how to take full advantage of Qt 4.5's and Qt 4.6's most valuable new APIs, application patterns, and development practices. Authored by Qt expert Mark Summerfield, this book concentrates on techniques that offer the most power and flexibility with the least added complexity. Summerfield focuses

especially on model/view and graphics/view programming, hybrid desktop/Web applications, threading, and applications incorporating media and rich text. Throughout, he presents realistic, downloadable code examples, all tested on Windows, Mac OS X, and Linux using Qt 4.6 (and most tested on Qt 4.5) and designed to anticipate future versions of Qt. The book Walks through using Qt with WebKit to create innovative hybrid desktop/Internet applications Shows how to use the Phonon framework to build powerful multimedia applications Presents state-of-the-art techniques for using model/view table and

Neo-Industrial
Organising explores an
emerging area of
importance in
management and
organisation studies,

namely the trend towards a projectization of the economy as a whole and the inter- and intra-organisational relations of renewal projects. By reporting on the experiences of twenty-five renewal projects from a wide variety of both local and international organisations, the authors develop a theoretical framework based on action and knowledge, in order to answer such key questions as: What is neo-industrial management? What does the future hold for organisations? How will institutions be formed? What effects will neo-industrial organising have on the individual and his/her work situation? Topics covered include: * industrial renewal, organisation and

management * project management and temporary organisation * personnel recruitment, selection and training * societal infrastructure Distinctive, relevant and accessibly written, this book will interest researchers and students in the field of organisational behaviour.
