How to control focus and depth of field on your iPhone ...

Manual focus allows you to control the plane where the camera sets its focus (called “hyperfocal point” in photography speak). Before iOS 8 you were only able to tap the part of the screen where you wanted focus to be set, and the iPhone would do its best to make that part focused (and also well exposed).

How To Use The New iOS 8 Manual Camera Controls

Manual focus in iOS works on a scale of 0.0 to 1.0, with macro on one end and "infinity" on the other. Developers can lock focus at any lens position to achieve focus along any point of that scale. Apple chose to use a scale rather than distance measures because of the way focus is implemented on the iPhone and iPad.

How to shoot manual and the benefits of RAW with an iPhone Manual is designed for one purpose: to enable you to take full control of your iPhone's camera. Many of the other camera apps are focused on adding filters after the picture is taken; Manual keeps it simple and is all about getting the best picture in camera.
