Popular Science Haynes Publishing UK

The complete history of Mazda's rotary engine-powered vehicles, from Cosmo 110S to RX-8. Charting the challenges, sporting triumphs, and critical reactions to a new wave of sports sedans, wagons, sports cars ... and trucks!

Whitaker's Cumulative Book List Pen and Sword Military

Launched in 1970 it used the underpinnings from the DS, which meant it had self-leveling hydro-pneumatic suspension, power brakes and good steering. Maserati produced a 170bhp, quad-cam V6 engine. Coupled with a stylish fastback bodyshell it should have been a good car. But v the engine was complicated and it was inclined to rust. When Peugeot took over Citroen they sold off Maserati and ceased production of the SM. A good car now is sought after and owners cannot praise them highly enough. This is a book of contemporary road and comparison tests, technical and specification data, new model introductions, driver's impressions & buyer's guide.

Whitaker's Books in Print David and Charles

In this new view on the Citroen story, automotive/ aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s - 1970s expansion, cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargeent and others, to give a full picture of Citroen heritage. Provides in-depth analysis of all major Citroen models with an engineering and design focus. Profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. Features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers.

Popular Science McFarland

Citroen stunned the automotive world when the DS series was introduced in 1955. Daringly futuristic and amazingly sophisticated mechanically, it made most cars on the road at the time obsolete. John Pressnell recounts the full story of the design, development, and production of these unique cars, and offers specifications plus a wide selection of archive and contemporary photos.

Illustrated Encyclopedia of Extraordinary Automobiles Penguin

Citroen has always been a pioneering car manufacturer, with a long line of original, advanced designs and a tradition of engineering excellence and innovation. In over 80 years of production, Citroen has produced no fewer than 28 distinct families of vehicles, many achieving cult status with enthusiasts of the marque. Told with great expertise and panache, here is the full post-war

story of Citroen cars, encompassing such favorites as the radical Traction Avant, iconic DS and cheeky 2CV. This installment of the popular Enthusiast Color Series introduces today's customs to the casual enthusiast. It features supply ideas and detailed information for the dedicated customizer, and shows a wide variety of customs and custom techniques, as well as what influenced the builders. The author examines 15 cars in full-color, detailed photographs.

Popular Science David and Charles

Launched in 1955 yet looking like a sci-fi design proposal for a future then undreamed of, Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world. There was a near riot at the 1955 Paris Motor Show launch of the car, orders flooded in for this, the new 'big Citroën' (a Voiture a Grande Diffusion or VGD) as the car that replaced the legendary Traction Avant range. The term 'DS' stems from two Citroën parts of nomenclature - the type of engine used as the 11D, (D) and the special hemispherical design of the cylinder head as 'Culasse Special' (S): DS out of 'Deesse' or Goddess, was a more popular myth of 'DS' origination, but an erroneous one. But it was not just the car's aerodynamically advanced body shape (Cd. 0.37) that framed the genius of the DS: hydro pneumatic self-levelling suspension, advanced plastics and synthetics for the construction of the roof and dashboard/fascia, and amazing road holding and cabin comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its 'aero' design was the precursor to today's low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers and many types of people, the DS redefined Citroën, its engineering and design language, and its brand, for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life DS spawned an estate car variant as the 'Safari', a range of limousines, two-door convertibles, and even coach-built coupes and rally specials. This car was a product design that became an article of social science - it was that famous and it defined a European design movement upon a global stage then packed with 'me too' copyist designs. The DS or 'Goddess' as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value-for-money book provides innovative access to the design, history, and modeling of the revolutionary DS - one of the true 'greats' of motoring history and, a contemporary classic car of huge popularity.

British Books in Print Penguin

Though American Motors never approached the size of Detroit's Big Three, it produced a long series of successful cars that were distinctive, often innovative and in many cases influential. This history examines AMC's cars from the company's formation in 1954 through its absorption by Chrysler in 1987. The Gremlin, Pacer and Eagle vehicles are examined in detail, as are the AMC custom cars of George Barris and Carl Green. The text details AMC's 1980s involvement with the French firm Renault and the design legacy of that joint venture, which includes the Hummer. The evolution of Jeep is covered from the 1960s through the 2000s. Features include some 225 photographs; a listing of AMC / Rambler clubs, organizations and business entities, with contact details; tables of detailed specifications and performance data; data on technical devices, trim packages and all model variations; a comprehensive account of AMC / Rambler appearances in film, television and cartoons.
