"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.
The Annotated Franchise Agreement Simon and Schuster
A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris' s only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Put-in-Bay investigative reporter Emerson Moore's relaxing fishing vacation to Chincoteague Island is interrupted when he becomes embroiled in deadly international intrigue affecting NASA rocket launches. Moore works his way through a maze of suspects, including some local troublemakers and rocket experts from Russia, China and Europe--any of whom might be motivated to sabotage the U.S. space program. Bodies start dropping faster than horses running from a wildfire while Moore is still knee-deep in identifying who's behind all the chaos, treachery and deception. Lives can be saved if only Moore can discover who is sabotaging the U.S. space program--and why--all while preventing himself from becoming a victim.

Introduction to Linear Algebra, Sixth Edition, is a foundation text that bridges both practical computation and theoretical principles. This book's flexible table of contents makes it suitable for students majoring in science and engineering as well as students who want an introduction to mathematical abstraction and logical reasoning. To achieve this flexibility, the authors focus on three principle topics: matrix theory and systems of linear equations, elementary vector space concepts, and the eigenvalue problem. This highly adaptable text is appropriate for a one-quarter or one-semester course at the sophomore/junior level, or for a more advanced class at the junior/senior level.

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Jack Nicklaus: My Story Simon and Schuster

"The franchise agreement is the document that establishes the franchise relationship. This business relationship is characterized by a franchisor granting a franchisee a temporary or time-limited right to use the franchisor's system and trademarks to conduct business. Because there is no 'one size fits all' template for drafting a franchise agreement, this must-have resource provides proven guidance on the core issues covered by a well-drafted agreement and how to carefully analyze the many considerations involved."--

Book Excerpt: ... But she said nothing of the sort of mystery connected with the powder; some instinct prevented her doing so. Nor did she tell that but a little of it remained, or that their stock of rose-leaves would soon be exhausted. "Who knows what may happen before that?" she reflected, and the words of Linde's dream-visitor recurred to her, "Three times, and then ask the robin." Dame Barbara was quite satisfied and greatly delighted. "Here," she said, fumbling for her substantial purse, "a groat for two ounces of it, did you say? No, a half-groat only? My dear, you'll have to raise your prices if the perfume is so excellent! Well to begin with, give me the four ounces straight away, and here's a half-groat over and above what it all comes to--dried leaves and fresh ones and flowers, all together--just the tiny silver piece for luck, you know..."

"A thrilling story of seduction, betrayal, and loss, Freud's *Mistress* will titillate fans of *Memoirs of a Geisha* and *The Other Boleyn Girl*." —Booklist
In *fin-de-siècle Vienna*, it was not easy for a woman to find fulfillment both intellectually and sexually. But many believe that Minna Bernays was able to find both with one man—her brother-in-law, Sigmund Freud. At once a portrait of two sisters—the rebellious, independent Minna and her inhibited sister, Martha—and of the compelling and controversial doctor who would be revered as one of the twentieth century's greatest thinkers, Freud's *Mistress* is a novel rich with passion and historical detail and "a portrait of

forbidden desire [with] a thought-provoking central question: How far are you willing to go to be happy?" * * * Publishers Weekly

Contributors present case studies and research findings in connection with both technical and nontechnical recycling issues (e.g. economic viability) in a variety of industries, including paper processing, steel can manufacturing, and agriculture. Chapters on such topics as reducing air emission of solvents from metal cleaning focus on how to re-engineer production lines for increased efficiency and less waste production. Others report on new technologies that make use of waste products like coal flyash, gypsum, and contaminated soil. Annotation copyright by Book News, Inc., Portland, OR
