The Principles and Practice of Cryptography and Network Security Stallings ' Cryptography and Network Security, Seventh Edition, introduces the reader to the compelling and evolving field of cryptography and network security. In an age of viruses and hackers, electronic eavesdropping, and electronic fraud on a global scale, security is paramount. The purpose of this book is to provide a practical survey of both the principles and practice of cryptography and network security. In the first part of the book, the basic issues to be addressed by a network security capability are explored by providing a tutorial and survey of cryptography and network security technology. The latter part of the book deals with the practice of network security: practical applications that have been implemented and are in use to provide network security. The Seventh Edition streamlines subject matter with new and updated material — including Sage, one of the most important features of the book. Sage is an open-source, multiplatform, freeware package that implements a very powerful, flexible, and easily learned mathematics and computer algebra system. It provides hands-on experience with cryptographic algorithms and

supporting homework assignments. With Sage, the reader learns a powerful tool that can be used for virtually any mathematical application. The book also provides an unparalleled degree of support for the reader to ensure a successful learning experience. American Light Trucks and Utility Vehicles, 1967-1989

The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

In the tradition of monumental Magnum books, this publication brings together an eclectic assortment of work by the finest photographers of our time, capturing a riveting and seductive series of fleeting moments around the world. For half a century, Magnum photographers - through countless commissions and their own personal work - have produced images that comment on the state of the world. In photographing the landscape they are not just spectators but participants, aware that the land itself has been shaped by man, and that the very notion of a landscape depends on a human viewpoint. As each photographer records and interprets a diversity of subject matter to form a unique personal style, the variations on this theme are

endless - landscapes of war, of agriculture, of industry, of cities and motorways, of desolation, celebration and tranquillity. The photographs assimilated in this book invite us to rediscover landscape, and urge us to think more profoundly not only about planet earth in its entirety, but about our own place in it.

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

A growing number of cases pending before the European Court of Justice (ECJ) concern the fundamental freedoms and direct taxation. This book scrutinises the national background of the most important of these cases and examines possible infringements of fundamental freedoms. The focus of each analysis is on the questions submitted to the ECJ by the national courts. Moreover, where available, the opinion of the Advocate General is discussed. The cases are presented by esteemed national and European tax law experts. This book goes to the heart of the national tax systems, exposing hidden obstacles to fundamental freedoms.

Ulli Steltzer, a distinguished photographer, takes the reader into the carving shed and studio to see Robert Davidson as he creates both monumental poles and intricately detailed powerful masks. More than 100 of her black-and-white photographs, reproduced in duotone, record both the evolution of Davidson and his art, from the early days up to the present, a span of 25

years. In the accompanying text and captions, Robert Davidson writes movingly about growing up Haida and his development as an artist, describes the creative and practical process of carving poles and masks, and discusses the place of art in Haida culture. An introduction by Aldona Jonaitis assesses Robert Davidson's place in the world of art. Robert Davidson has produced an internationally acclaimed body of art, in particular a number of large totem poles and masks in collections in Canada and the United States, including the Southwest Museum in Los Angeles, the National Gallery of Canada, the Canadian Museum of Civilization, and the Vancouver Art Gallery.
