Discover the USA Today bestselling self-help memoir from a former Army Ranger, a hero of the 2012 Benghazi siege, and the subject of the book and movie 13 Hours, as he shares life-changing lessons of discipline, motivation, success, and peace. Thousands of people have heard Kris "Tanto" Paronto speak about his experiences in Benghazi on September 11, 2012. But before he was a security contractor, Tanto was a US Army Ranger from 2nd Battalion 75th

Ranger Regiment. In The Ranger Way, Tanto shares stories from his training experiences that played a role in his team's heroic response in Benghazi on September 11, 2012. Being a Ranger is, by design, not for everyone, but anyone can use the expectations and techniques of Ranger culture to achieve personal victory. Tanto shows you how to define your mission, set goals that are in alignment with your values, and develop a battle plan that will maximize your chances of success. You will learn why you should never quit and why that is different from never failing. Tanto uses his experiences in Basic and Ranger Training to explore how to deal with mistakes and disappointment like a leader, accept responsibility, and turn every obstacle into an opportunity for growth. You will learn why service and sacrifice will help you succeed- and how the power of humility, strength, faith, and brotherhood will sustain you on the road to

accomplishing your mission.

Forensic Investigation of Stolen-Recovered and Other Crime-Related Vehicles provides unique and detailed insights into the investigations of one of the most common crime scenes in the world. In addition to a thorough treatment of auto theft, the book covers vehicles involved in other forms of crime—dealing extensively with the various procedures and dynamics of evidence as it might be left in any crime scene. An impressive collection of expert contributors covers a wide variety of subjects, including chapters on vehicle identification, examination of burned vehicles, vehicles recovered from under water, vehicles involved in terrorism, vehicle tracking, alarms, anti-theft systems, steering columns, and ignition locks. The book also covers such topics as victim and witness interviews, public and private auto theft investigations, detection of trace evidence and chemical traces, vehicle search techniques, analysis of automotive fluids, vehicle registration, document examination, and vehicle crime

mapping. It is the ultimate reference guide for any auto theft investigator, crime scene technician, criminalist, police investigator, criminologist, or insurance adjuster. - Extensively researched and exceptionally well-written by internationally-recognized experts in auto theft investigation and forensic science - All the principles explained in the text are well-illustrated and demonstrated with more than 450 black and white and about 100 full-color illustrations, many directly from real cases - Serves as both a valuable reference guide to the professional and an effective teaching tool for the forensic science student

A New York Times Bestseller. How much damage will the Democrats do to our republic in the name of saving it? In the years he served on and eventually chaired the United States House Committee on Oversight and Government Reform, Jason Chaffetz gained crucial insight into the inner workings of D.C. Things were bad then, but during the Trump administration, liberals have reached a new level of hysteria and misconduct. Democrat anger has grown so irrational that it has burst through the constitutional guardrails which protect our institutions and our republic. While they constantly label the right “ fascist, ” the left imposes policies which suppress speech, limit freedom, and empower federal bullies. In Power Grab, Chaffetz pulls back the curtain on the world of

---

hypocrisy, political intrigue, and procedural malfeasance that is Washington D.C. With stories you won't read anywhere else, he shows how the left weaves false narratives, drums up investigations in search of a crime, and refuses to direct congressional oversight towards its appropriate target: the government. Democrats weaponize nonprofit advocacy groups and monetize partisan anger to line the pockets of their political allies. They use "voter enrollment" as a smokescreen to hide their plans to destabilize free elections and seek to politicize federal agencies like the Federal Election Commission, the IRS, and the Department of Justice. It shouldn't be this way. Democrats have abandoned the wisdom set forth in the Constitution for short-term political wins. Power Grab shows the lengths to which Democrats will go to maintain their grip on power, and how the only thing that will stop them is a return to our founding principles.

In the 1950's, the design and implementation of the Toyota Production System (TPS) within Toyota had begun. In the 1960's, Group Technology (GT) and Cellular Manufacturing (CM) were used by Serck Audco Valves, a high-mix low-volume (HMLV) manufacturer in the United Kingdom, to guide enterprise-wide transformation. In 1996, the publication of the book Lean Thinking introduced the

entire world to Lean. Job Shop Lean integrates Lean with GT and CM by using the five Principles of Lean to guide its implementation: (1) identify value, (2) map the value stream, (3) create flow, (4) establish pull, and (5) seek perfection. Unfortunately, the tools typically used to implement the Principles of Lean are incapable of solving the three Industrial Engineering problems that HMLV manufacturers face when implementing Lean: (1) finding the product families in a product mix with hundreds of different products, (2) designing a flexible factory layout that "fits" hundreds of different product routings, and (3) scheduling a multi-product multi-machine production system subject to finite capacity constraints. Based on the Author's 20+ years of learning, teaching, researching, and implementing Job Shop Lean since 1999, this book Describes the concepts, tools, software, implementation methodology, and barriers to successful implementation of Lean in HMLV production systems Utilizes Production Flow Analysis instead of Value Stream Mapping to eliminate waste in different levels of any HMLV manufacturing enterprise Solves the three Industrial Engineering problems that were mentioned earlier using software like PFAST (Production Flow Analysis and Simplification Toolkit), Sgetti and Schedlyzer Explains how the one-at-a-time implementation of manufacturing cells constitutes a long-term strategy

---

for Continuous Improvement Explains how product families and manufacturing cells are the basis for implementing flexible automation, machine monitoring, virtual cells, Manufacturing Execution Systems, and other elements of Industry 4.0 Teaches a new method, Value Network Mapping, to visualize large multi-product multi-machine production systems whose Value Streams share many processes Includes real success stories of Job Shop Lean implementation in a variety of production systems such as a forge shop, a machine shop, a fabrication facility and a shipping department Encourages any HMLV manufacturer planning to implement Job Shop Lean to leverage the co-curricular and extracurricular programs of an Industrial Engineering department
