With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

It's been said that "self-publishing is the future of publishing." Each year, self-publishing companies publish many more books than the year before. Large traditional publishers have formed self-publishing operations, and tiny publishers have copied them. Apple allows self-published authors to sell books for iPads. Bookselling giants Amazon and Barnes & Noble publish eBooks for authors. Self-publishing companies enable anyone who can type to quickly become a "published author" and compete for the attention of the reading public. There is no longer a need to go through the years-long process of finding an agent and publisher. Sadly, some self-publishing companies publish badly written books, and do a bad job of publishing and promoting them. Their writer-customers spend a lot of money, and many are disappointed in their books' quality and limited sales and book reviews. You can minimize disappointment if you are properly prepared--and this book will prepare you to pick the right publisher, make the best deal and get the best book. It warns you not to buy

services and trinkets that you don't need and to pay the right prices for what you do need. Let the publisher do the work you don't want to get involved in, and concentrate on the creative process--perhaps with independent editors and designers. Make a good-reading, good-looking book which you can be proud of and maybe make money from. The fully illustrated book is detailed, yet easy-to-read. It will guide you from picking a subject and title, through writing, editing, cover design, interior formatting, pricing, establishing a publishing business, and promoting your books. There's an extensive publishing glossary, and even a section with words that are tricky to spell. The book includes recent developments including iPad, MS Word 2010, Nook, Pubit! and AuthorHive. It's loaded with info and tips based on personal experience and extensive research, and is useful for all authors. It's funny, too. Michael N. Marcus is an author, publisher, businessman, advertising copywriter and a journalist who has been writing professionally for over 40 years. He is a successful and popular explainer, known for mixing technology and humor. Michael has self-published more than ten books. His first book on self-publishing has been called the best in its field, and has been on two Amazon bestseller lists.

The last thirty years of American history have produced a compelling range of images: Vietnam and the student protests, Robert Kennedy's assassination and Richard Nixon's election, the

trauma of Watergate and the recovery under Gerald Ford and Jimmy Carter, the fragile beginnings of peace in the Middle East and the crumbling of the Soviet Union. David Hume Kennerly's astonishing photographs of these and many other events that shaped our times are among the images forever imprinted in our memories. Kennerly was always there with his camera - on the battlefield, at ringside, or behind closed doors in the Oval Office. This eyewitness collection presents over 250 of his most dramatic photographs, many published here for the first time. Augmented by Kennerly's first-hand recollections of the historic events he witnessed, the photographs range from an early Supremes concert through Jonestown, with vivid coverage of Vietnam and other wars, the final days of the Nixon presidency, the inside workings of the Ford Administration, and groundbreaking events in international diplomacy.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
