Ford Focus 01-05 Service and Repair Manual Lemon-Aid New and Used Cars and Trucks 2007–2018
Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car

Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

Building a Special with Ant Anstead Master Mechanic Haynes Manuals

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
