Academic Title 2016  
Genocide and Gender in the Twentieth Century brings together a collection of some of the finest Genocide Studies scholars in North America and Europe to examine gendered discourses, practices and experiences of ethnic cleansing and genocide in the 20th century. It includes essays focusing on the genocide in Rwanda, the Armenian genocide in the Ottoman Empire, the Holocaust and ethnic cleansing and genocide in the former Yugoslavia. The book looks at how historically- and culturally-specific ideas about reproduction, biology, and ethnic, national, racial and religious identity contributed to the possibility for and the unfolding of

genocidal sexual violence, including mass rape. The book also considers how these ideas, in conjunction with discourses of femininity and masculinity, and understandings of female and male identities, contributed to perpetrators' tools and strategies for ethnic cleansing and genocide, as well as victims' experiences of these processes. This is an ideal text for any student looking to further understand the crucial topic of gender in genocide studies.

 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth.  $r'$  = radius of moon, or other body.  $P$  = moon's horizontal parallax = earth's angular semidiameter as seen from the moon.  $f$  = moon's angular semidiameter. Now  $\frac{P}{f} = \frac{r'}{r}$  (in circular measure),  $r' - r = r$  (in circular measure);  $\therefore r' : r :: P : f$ , or (radius of earth) : (radius of

moon):: (moon's parallax): (moon's semidiameter). Examples.  
 1. Taking the moon's horizontal parallax as  $57'$ , and its angular diameter as  $32'$ , find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter =  $16'$ ;  $\therefore 4000 :: 57' : 16'$ ;  $\therefore r = 400 \frac{16}{57} = 1123$  miles.  
 2. The sun's horizontal parallax being  $8''$ , and his angular diameter  $32V$  find his diameter in miles.  $\therefore \frac{P}{f} = \frac{r'}{r}$ . Am.  $872,727$  miles.  
 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am.  $1'' - 54$  per minute.  
 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50)  $S : V :: VA :: 7 : 3$ . But  $S$  has a relative angular velocity round the sun of  $1'' - 54$  per minute (see Example 3); therefore, the relative angular velocity of  $A$   $V$  round  $A$  is greater than this in the ratio of 7 : 3, which gives an approximate result of  $3'' - 6$  per minute, the true rate being about  $4''$  per minute. displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

A proponent of the poor and landless peasants, Miguel is commissioned by an old friend to plan strategies for insurgents operating in the northern part of Mexico. After he and Anne Marie trek north, Miquel learns that he will be involved in planning strategies and raids not only for his compatriot, but also for one of Mexico ' s most infamous desperados, Francisco Pancho Villa. Now lovers and committed to each other, Anne Marie blindly accepts Miquel ' s calling. Eventually, she is presented with a young Indian maid recued in one of Villa ' s raids. Unaware of the pillaging, raping and shooting that Villa and his men have been conducting in the name of freedom and justice, she is inadvertently exposed to Villa ' s devastation while seeking medical attention at another village. Pleading with Miquel to stop this carnage, he passionately convinces her that he is only planning strategies. Perceiving the intensity of his fervor, Anne Marie realizes that she cannot dissuade Miquel. After overhearing his plans for a raid by Villa ' s men on a nearby hacienda, now under the charge of an American Army major assisting the Mexican government in its attempt to diffuse and quell insurgent uprisings, Anne Marie is torn between her loyalty to Miquel and to a United States citizen in imminent danger of attack and death by Villa ' s insurgents.
