Why should there only be literary scholarship about authors who actually lived, and texts which exist? Where are the articles on Enoch Campion, Linus Withold, Redondo Panza, Darshan Singh, or Heidi B. Morton? That none of these are real authors should be no impediment to interpreting their invented writings. In the first collection of its kind, *The Anthology of Babel* publishes academic articles by scholars on authors, books, and movements that are completely invented. Blurring the lines between scholarship and creative writing, *The Anthology of Babel* inaugurates a completely new literary genre perfectly attuned to the era we live in, a project evocative of Jorge-Louis Borges, Umberto Eco, and Italo Calvino.

Coastal and marine ecosystems, some severely degraded, other still pristine, control rich resources of inshore environments and coastal seas of Latin America's Pacific and Atlantic margins. Conflicts between the needs of the region's nations and diminishing revenues and environmental quality have induced awareness of coastal ecological problems and motivated financial support for restoration and management. The volume provides a competent review on the structure, processes and function of 22 important Latin American coastal marine ecosystems. Each contribution describes the environmental settings, biotic components and structure of the system, considers trophic processes and energy flow, evaluates the modifying influence of natural and human perturbations, and suggests management needs. Although the focus of the book is on basic ecological research, the results have application for coastal managers.

Myers' Psychology for the AP® Course Bloomsbury Publishing

Many books on celestial navigation take shortcuts in explaining concepts; incorrect diagrams and discussion are often used for the sake of moving the student along quickly. This book tells the true story-and the whole story. It conveys celestial navigation concepts clearly and in the shortest possible time. It's tailored for navigation in the GPS age-a time of computers, calculators, and web resources. Although it covers all of the traditional methods of 'working a sight,' the primary thrust is using the (under \$10) scientific calculator. By using equations that you key into your calculator, this book guides you toward a better understanding of the concepts of celestial navigation. You will learn novel ways to plot lines of position, ways to check your sextant accurately by star sights, and how to tell what time it is from a moon sight. The many appendices are a treasure of references and explanations of abstract ideas. Celestial Navigation is a crucial skill for the offshore navigator to know, this book provides the shortest path to that knowledge.

This manual is a complete user manual for Garmin handheld receivers. It covers theory and practical applications for gps technology and the receivers that use this technology. Representative products for all of the Garmin handheld receivers, past and present, are explained and tips are given on getting the most out of each model. It is designed to augment the user manuals that are supplied with each product but is complete enough to replace them. While this manual is Garmin specific it provides a basic understanding of gps devices that is applicable to any gps receiver. It was written over a period of 4 years and has been reviewed and tested by hundreds of users over that period. It has been used as the reference for training on gps usage. Because of its unique approach that develops the theory behind operation as well as specific details, it provides a basis that will allow a user to be able to use any gps receiver. Skills in the use of a gps will provide assurance and safety for the user. Topics extend beyond just operating the unit to actually being able to use it for navigation on the land, in the sea, or in the air. Topics are applicable whether you are hiking or driving to your destination. These topics include product operation, waypoints, routes, tracklogs, navigation, maps and databases, product selection, features, theory, accessories, and product unique functions.

Exploring Psychology BoD - Books on Demand France

As early as the first millennium A.D., the Philippine archipelago formed the easternmost edge of a vast network of Chinese, Southeast Asian, Indian, and Arab traders. Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite. *Raiding, Trading, and Feasting* presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies. By combining archaeological evidence with historical sources, Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms. Most importantly, she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies, rather than foreign contacts, that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history. A broad spectrum of historical and ethnographic sources, ranging from tenth-century Chinese tributary trade records to turn-of-the-century accounts of chiefly "feasts of merit," highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago. The political ascendance of individual polities, the emergence of more complex forms of social ranking, and long-term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age (late first millennium B.C.) to the colonial period. The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long-term dynamics of chiefly political economy in a single region. Reaching beyond the Philippine archipelago, this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states. It attempts to address the question of why Philippine polities, like early historic kingdoms elsewhere in Southeast Asia, have a segmentary political structure in which political leaders are dependent on prestige goods exchanges, personal charisma, and ritual pageantry to maintain highly personalized power bases. *Raiding, Trading, and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature. It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms.

PC Magazine Cambridge University Press

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. *Remembering Simplified Hanzi* covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.
