A manual for amateur radio enthusiasts discusses the history of packet radio, hardware systems, networking, setting up an

amateur packet radio station, and equipment and accessories

PHP & MySQL: The Missing Manual Kepustakaan Populer Gramedia

This pioneering edited collection explores the question of how organizations manage the future. Moving away from traditional research which focuses on the past, the editors problematize the future as an inherent but under-examined part of organizing. Arguing that the future acts as both a driver of and a performative result of organizing, the book asks how organizations conceptualize and deal with the future and what processes are in place to

handle things to come. With empirical research examining the practices, discourses and concepts that play key roles, organizations and their approaches are scrutinized. A timely compendium of theoretical discussion and practical implications on the relevance of the future, this book is essential reading for those interested in organization, sociology and management studies.

The Electronics of Radio Springer Nature

Discover (or rediscover) the fun and magic of building electronic circuits with thermatrons (vacuum tubes).

This book has everything you need to know about the art and science of thermatron design and construction. It pulls together, in one easy to read book, thermatron types and characteristics, thermatron homebrew techniques, and how to design audio and RF triode and pentode circuits. The book is written primarily for radio amateurs (or audio equipment builders) that already understands basic electronics but have forgotten or never had the pleasure of working with hollow-state devices. The

Second Edition includes over 50+ pages of new and revised material including a new chapter on thermatron oscillator design.

A Life Less Ordinary Springer

This book provides specialists and executives with a clear, yet practical set of recommendations to meet the challenges of digital transformation and ensure long-term success as a leader in a primarily digital business world.

The authors describe the fundamental principles of digitization and its economic opportunities and risks, integrating them into a framework of classic and new management methods. The book

also explores how increasing digitization – not only of communication, but of complete value chains – has led to a need to establish a digital business leadership. Digitization is changing people and markets: it causes the upheaval of entire industries, creates new digital-centric companies, and forces established companies to cope with the transformation activities associated with these digitization processes. New approaches and methods have to be learned, tried and tested patterns of thinking have to be explored, and last but not least, innovation activities have to be understood as continuous necessities. At the same time, digital business offers

considerable opportunities for renewing competitive advantages, improving existing process structures and realigning products, services and business models.

This book addresses the biological processes relevant to the immune phenotypes of

cancer and their significance for immune responsiveness, based on the premise that malignant cells manipulate their surroundings through an evolutionary process that is controlled by interactions with innate immune sensors as well as the adaptive recognition of self/non-self. Checkpoint inhibitor therapy is now an accepted new form of cancer treatment. Other immuno-oncology approaches, such as adoptive cell therapy and metabolic inhibitors, have also shown promising results for specific	indications. Immune resistance is common, however, limiting the efficacy of immunotherapy in many common cancer types. The reasons for such resistance are diverse and peculiar to the immune landscapes of individual cancers, and to the treatment modality used. Accordingly, approaches to circumvent resistance need to take into account context-specific genetic, biological and environmental factors that may affect the cancer immune cycle, and which can	best be understood by studying the target tissue and correlated systemic immune markers. Understanding the major requirements for the evolutionary process governing human cancer growth in the immune-competent host will guide effective therapeutic choices that are tailored to the biology of individual cancers. <u>The Packet Radio Handbook</u> American Radio Relay League (ARRL) ARE YOU INTERESTED IN RADIANT SKIN AND A PERFECTLY FIT

In the 1950s, New York City's Birdland was the center of the world of modern jazz--and a revelation to Bill Crow, a wet-behind-the-ears twenty-two-year-old from Washington State. Located on Broadway between 52nd

and 53rd streets, the club named for the incomparable Charlie "Bird" Parker boasted lifesize photo murals of modern jazzmen like Dizzy Gillespie, Lennie Tristano, and, of course, Bird himself, looming large against jet black walls. Exotic live birds perched in cages behind the bar. The midget master of ceremonies, 3'9" Pee Wee Marquette, dressed in a zoot suit and loud tie, smoked huge cigars and screeched mispronounced introductions into the microphone. And the

jazz-struck young Crow would park in the bleachers till 4 am, blissfully enveloped by the heady music of Bird, Bud Powell, Max Roach, and a host of other jazz giants. From Birdland to Broadway is an enthralling insider's account of four decades of a life in jazz. Bill Crow, journeyman bass player, superb storyteller, and author of the successful *Jazz Anecdotes*, here narrates many moving and delightful tales of the pioneers of modern jazz he played with and was befriended by. We

find Dizzy Gillespie, with whom Crow, because of prior commitments, regrettably declined steady work, dancing at the Royal Roost, Stan Getz sadly teetering on the brink of losing himself to drugs, and Harry Belafonte (known then as "the Cinderella Gentleman") running a lunch counter in New York's Sheridan Square between music dates. And we also witness many of the highlights of Crow's career, such as in 1955 when the Marian McPartland Trio (with Crow on bass) was named "Small Group of the Year" by Metronome; Crow playing with the Gerry Mulligan Quartet at venues like Storyville in Boston and Harlem's Apollo Theater (where they appeared with Dinah Washington); and the tour of the Soviet Union with Benny Goodman, a journey that might have been a high point of Crow's travels abroad but was marred by Goodman's legendary mistreatment of his band. Moving beyond jazz clubs to the Broadway concert pit and a variety of studio gigs in the '60s, Crow encounters actors such as Yul Brynner and pop-rock acts like Simon and Garfunkel. From the great to the near-great, from Billie Holiday to Judy Holliday, Bill Crow's wealth of personal anecdotes takes the reader from Birdland, to the Half Note, to the Playboy Club, to the footlights of Broadway. This revealing book is a marvelous portrait of the jazz world, told by someone who's been there.

The Year of the Dog

Springer Nature

"I found solace in nothing. Because everything was temporary. And days flew by like heavy cigarette smoke floating above the dancing heads in the city's most notorious club, like speech bubbles written in a language you cannot understand, like a dragon's breath you keep chasing, like pills that move from your

hand to your red lips."

Gratiagusti Chananya Rompas' personal essays are troves of memories she can always turn back to. They started off as day-to-day accounts of events from her younger years and the now. But Anya, as she is often called, is obsessed with how things people do — often in haste — quickly fossilize into memories, and how these memories, in turn, shape their lives.
