This book is designed to meet the needs of both dental students and dentists by providing succinct and quickly retrievable answers to common dental questions. Students will find both that it clearly presents the particulars which should be familiar to every dentist and that it enables them to see the big picture and contextualize information introduced to them in the future. Practicing dentists, on the other hand, will employ the book as a daily reference to source information on important

topics, materials, techniques, and conditions. The book is neither discipline nor specialty specific. The first part is wide ranging and covers the essentials of dental practice while the second part addresses individual specialties and the third is devoted to emergency dental treatment. Whether as a handy resource in the student's backpack or as a readily available tool on the office desk, this reference manual fills an important gap in the dental literature.

This book is a practical resource that will support the

delivery of holistic mental health interventions in the primary and community care setting for older people. Primary care delivery is discussed in relation to both functional mental health problems, such as anxiety, depression, and psychotic and personality disorders, and acquired organic mental disorders of old age, such as dementia, cognitive impairments, and delirium. Careful consideration is paid to the complex relationship between mental and somatic health problems, as well as the

---

impacts of multimorbidity and polypharmacy. Further topics include, for example, epidemiology, wider determinants of health, different care models, history taking, neurocognitive and capacity assessment, and pharmacological, psychological, and physical interventions. The wider goals of the book are to support the development of community resilience and self-care in older people; to promote universal access and equity for older people in order to enable them to achieve or recover the	highest attainable standard of health, regardless of age, gender, or social position; and to promote pathways to care for older people with mental health problems respecting their autonomy, independence, human rights, and the importance of the life-course approach.
