"When bebop was new," writes Thomas Owens, "many jazz musicians and most of the jazz audience heard it as radical, chaotic, bewildering music." For a nation swinging to the smoothly orchestrated sounds of the big bands, this revolutionary movement of the 1940s must have seemed destined for a short life on the musical fringe. But today, Owens writes, bebop is nothing less than "the lingua franca of jazz, serving as the principal musical language of thousands of jazz musicians." In *Bebop*, Owens conducts us on an insightful, loving tour through the music, players, and recordings that changed American culture. Combining vivid portraits of bebop's gigantic personalities with deft musical analysis, he ranges from the early classics of modern jazz (starting with the 1943 Onyx Club performances of Dizzy Gillespie, Max Roach, Oscar Pettiford, Don Byas, and George Wallington) through the central role of Charlie Parker, to an instrument-by-instrument look at the key players and their innovations. Illustrating his discussion with numerous musical excerpts, Owens skillfully demonstrates why bebop was so revolutionary, with fascinating glimpses of the tempestuous jazz world: Thelonious Monk, for example, did "everything 'wrong' in the sense of traditional piano technique....Because his right elbow fanned outward away from his body, he often hit the keys at an angle rather than in parallel. Sometimes he hit a single key with more than one finger, and divided single-line melodies between two hands." In addition to his discussions of individual instruments and players, Owens examines ensembles, with their sometimes volatile collaborations: in the *Jazz Messengers*, Benny Golson told of how his own mellow saxophone playing would get lost under Art Blakey's furious drumming: "He would do one of those famous four-bar drum rolls going into the next chorus, and I would completely disappear. He would holler over at me, 'Get up out of that hole!'" In this marvelous account, Owens comes right to the present day, with accounts of new musicians ranging from the Marsalis brothers to lesser-known masters like pianist Michel Petrucciani. *Bebop* is a jazz-lover's dream--a serious yet highly personal look at America's most distinctive music.

At the age of twenty-six, Maarten Troost—who had been pushing the snooze button on the alarm clock of life by racking up useless graduate degrees and muddling through a series of temp jobs—decided to pack up his flip-flops and move to Tarawa, a remote South Pacific island in the Republic of Kiribati. He was restless and lacked direction, and the idea of dropping everything and moving to the ends of the earth was irresistibly romantic. He should have known better. The *Sex Lives of Cannibals* tells the hilarious story of what happens when Troost discovers that Tarawa is not the island paradise he dreamed of. Falling into one amusing misadventure after another, Troost struggles through relentless, stifling heat, a variety of deadly bacteria, polluted seas, toxic fish—all in a country where the only music to be heard for miles around is "La Macarena." He and his stalwart girlfriend Sylvia spend the next two years battling incompetent government officials, alarmingly large critters, erratic electricity, and a paucity of food options (including the Great Beer Crisis); and contending with a bizarre cast of local characters, including "Half-Dead Fred" and the self-proclaimed Poet Laureate of Tarawa (a British drunkard who's never written a poem in his life). With *The Sex Lives of Cannibals*, Maarten Troost has delivered one of the most original, rip-roaringly funny travelogues in years—one that will leave you thankful for staples of American civilization such as coffee, regular

showers, and tabloid news, and that will provide the ultimate vicarious adventure. *Yamaha 125 Model YA5 Service Manual* Penguin UK

The dramatic story of five key turning points in a thousand years of Western music - discoveries that changed the course of history. Who first invented 'Doh Re Mi...'? What do we mean by "in tune"? Looking back down the corridor of a thousand years, Howard Goodall guides us through the stories of five seismic developments in the history of Western music. His "big bangs" may not be the ones we expect - some are surprising and

some are so obvious we overlook them - but all have had an extraordinary impact. Goodall starts with the invention of notation by an 11th-century Italian monk, which removed the creation of music from the hands of the players to the pens of the composers; moves on to the first opera; then to the invention of the piano, and ends with the story of the first recording made in history. Howard Goodall has the gift of making these complicated musical advances both clear and utterly fascinating. Racy and vivid in a narrative full of colourful characters and graphic illustrations of technical processes, he also gives a wonderful sense of the culture of trial and error and competition, be it in 11th-century Italy or 19th-century America, in which all progress takes place. Big Bangs opens a window on the crucial moments in our musical culture - discoveries that made possible everything from Bach to the Beatles - and tells us a riveting story of a millennium of endeavour.
