Inland saline waters are threatened worldwide by diversion and pollution of their inflows, introductions of exotic species and economic development of these ecologically valuable habitats. Since 1979 a series of international symposia on inland saline waters has served to strengthen and expand the scope of limnological research on inland saline waters. The seventh conference continued this tradition and the

papers derived from the conference focused on the ecology of microbial communities, the influence of habitat geochemistry on biogeography of flora and fauna, physical and geochemical processes, and the conservation of inland saline waters. Of particular note are papers on Walker Lake, Nevada (USA), and the Salton Sea and Mono Lake, California (USA). Continued local, national and international efforts are required to inform the public and decision makers about the environmental problems faced by saline waters. The papers in this volume will serve this end and should be of interest to aquatic ecologists, limnologists, aquaculturalists, and water resource managers.

"A sprightly and clear-eyed testimonial to the value of globalization" (The Wall Street Journal) as seen through six surprising everyday goods—the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the blockbuster HBO series Game of Thrones. Trade allows us to sell what we produce at home and purchase what we don't. It lowers prices and gives us greater variety and innovation. Yet understanding our place in the global trade network is rarely simple. Trade has become an easy excuse for struggling economies, a scapegoat for our failures to adapt to a changing world, and—for many Americans on both the right and the left—nothing short of a four-letter word. But as Fred P. Hochberg reminds us, trade is easier to understand than we commonly think. In Trade Is Not a Four-Letter Word, you'll learn how NAFTA became a populist punching bag on both sides of the aisle. You'll learn how Americans can avoid the grim specter of the \$10 banana. And you'll finally discover the truth about whether or not, as President Trump has famously tweeted, "trade wars are good and easy to win." (Spoiler alert—they aren't.) Hochberg debunks common trade myths by

pulling back the curtain on six everyday products, each with a surprising story to tell: the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the smash hit HBO series Game of Thrones. Behind these six examples are stories that help explain not only how trade has shaped our lives so far but also how we can use trade to build a better future for our own families, for America, and for the world. Trade Is Not a Four-Letter Word is the antidote to today's acronym-laden trade jargon pitched to voters with simple promises that rarely play out so one-dimensionally. Packed with colorful examples and highly digestible explanations, Trade Is Not a Four-Letter Word is "an accessible, necessary book that will increase our understanding of trade and economic policies and the ways in which they impact our daily lives" (Library Journal, starred review).
