New York from Above is a collection of spectacular photographs taken by Evan Joseph of New York City's most iconic landmarks and skyscrapers. Commissioned by One World Trade Center for the opening of the iconic One World Observatory in May 2015 and only available at One World Observatory, this is the first time the book has been made available to the public. Evan Joseph, widely regarded as New York's top real estate photographer, has spent nearly three decades shooting the city's greatest tourist destinations and most coveted real estate, including the penthouses and homes of Sting and Trudie Styler, Rupert Murdoch, Jon Bon Jovi, Alex Rodriguez, Sean P. Diddy Combs, and many others. The book includes brief descriptions by Joseph about his process for getting the perfect shot, including death-defying shots from the exterior of a helicopter.

Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

Thompson, Dan Vena, and Robert G. Weiner The Supervillain Reader, featuring both reprinted and original essays, reveals why we are so fascinated with the villain. The obsession with the villain is not a new phenomenon, and, in fact, one finds villains who are "super" going as far back as ancient religious and mythological texts. This innovative collection brings together essays, book excerpts, and original content from a wide variety of scholars and writers, weaving a rich tapestry of thought regarding villains in all their manifestations, including film, literature, television, games, and, of course, comics and sequential art. While The Supervillain Reader focuses on the latter, it moves beyond comics to show how the vital concept of the supervillain is part of our larger consciousness. Editors Robert Moses Peaslee and Robert G. Weiner collect pieces that explore how the villain is a complex part of narratives regardless of the original source. The Joker, Lex Luthor, Harley Quinn, Darth Vader, and Magneto must be compelling, stimulating, and proactive, whereas the superhero (or protagonist) is most often reactive. Indeed, whether in comics, films, novels, religious tomes, or video games, the eternal struggle between villain and hero keeps us coming back to these stories over and over again.

Ever wonder about the safety of an electrical system? With electrical wiring often buried within the hollow, inaccessible construction of a structure, it is often difficult to easily detect issues with the electrical wiring. The question arises...what makes our electrical systems safe? In short, they

are safe because qualified persons install work to achieve code compliance, and inspectors verify that minimum requirements are met to ensure that the installations are virtually free of electrical hazards. Many qualified electrical inspectors evolved from being qualified electrical workers to becoming qualified electrical inspectors.

This volume focuses on food preservation prior to distribution and sale, which is a major challenge in the tropical climates of most developing nations. In order to assure that food products are safe for human consumption, due importance must be given to the quality and safety aspects of production, processing, and distribution. This volume provides an informative overview of recent research on the therapeutic potential of various new and natural compounds along with novel technologies for enhanced shelf-life longevity and food safety. It also looks at the antimicrobial constituents of different sources and the history of their use as biopreservatives. It includes scientific evaluations of their use as alternative or potential biopreservatives. Focusing on real-life applications in consumer and food products, the book is divided into three parts, covering health and quality aspects of food preservation, applications of novel biomolecules for quality and safety of foods, and novel research techniques in food biopreservation.

From July to Sept. 2014 all book sales will go to housing our homeless veterans here in the US. Check out <http://www.gofundme.com/b34yes> for more information. Thank you! Letters to Boot Camp provides the reader with a heart wrenching and awe inspiring look into the lives of a mother and her son as he made his way through Boot Camp on Parris Island. - "Once they're shipped out to Boot Camp, the only things that those of us left at home can really do for them is to write and pray. And if you're lucky, smuggle in the occasional treat. (I did.) It wasn't easy, but I wrote him every day, and he wrote me as often as he could. Inside these pages you'll find our personal story, our personal letters, and a good deal of information you may find useful. I like to think of Parris Island as a place of miraculous change and growth. Yeah, change isn't easy, and growing often hurts, but the end result is worth every bit of it." - - "On November 7, 2011, in a hotel lobby, I smiled and gave my son one last big hug. I told him I loved him and how proud I was of him. The last thing I said was, "You go kick some ass Baby, and I'll be there waiting when you're done." He had to go, so with that I turned around and walked out. Yes, I did look back, and yes, he did grin and wave. From there he would go to MEPS one last time and then get on a bus with all his new best buddies to Parris Island where they would be made into Marines." -

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
