Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

The reality of espionage isn't easily disentangled from its mythology – and somewhere at the uneasy confluence of these dimensions is the fiction of John le Carré. A former British intelligence officer, le Carré has captured the shadows and textures of the covert world with a sure eye for its nuances and a deep appreciation of the human factor. And while intelligence work may be far removed from the experiences of most of us, its grand themes – loyalty and betrayal – touch everyone. In Le Carré 's Landscape Tod Hoffman, a former intelligence officer, offers a unique perspective on le Carré 's work. He juxtaposes his own experiences and extensive research with le Carré 's fiction, shedding light on those dank recesses where spying is done. Taking the reader through the countries and continents of le Carré 's fiction, Hoffman reflects on the political causes and personal effect of spying – secrecy, manipulation, deceit, treason. Le Carré 's Landscape is a unique look at the master of the spy genre – a man who has captured the imaginations of millions of readers and perhaps enticed more than a few into the real world of espionage.

The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

Hypertext was going to revolutionize the very way in which we read and write. However, while hypertext's non-linearity has been embraced by enthusiasts keen to experiment with interactive literary genres, to date, the non-linear medium has made little impact on scholarly discourse and argumentation, which have traditionally heavily relied on linearity. Is this because hypertextual narrative is simply incompatible with the requirements of certain genres? Or could it be that hypertext's essential characteristics have yet to be fully understood and exploited? Cinematic Hypertext is for theorists and designers ready to consider a new paradigm for framing the medium and its characteristics: film. Clara Mancini guides the reader through an eclectic mix of ideas from technology, psycholinguistics, visual design, narratology and film theory. En route, Cinematic Hypertext offers an intellectual workout for media theorists and coherence relations scholars, with analyses of cinematic grammars, film clips, hypertexts, and hypertext systems, grounded in an underlying theory of Cognitive Coherence Relations. Those ready to build experimental systems will find design principles and guidelines, and the evidence reported will be of particular interest to those wondering if the theory behind cinematic hypertext is valid empirically. The result is a novel way of thinking about hypertext which complements existing hypertext paradigms, with Mancini inviting the reader to design hypertexts capable of communicating through a visual language inspired by the power of cinema.

Simulators are becoming standard equipment for interactive learning environments. They allow for attractive teaching with a large degree of freedom for the learner. However, without proper guidance, the learner easily gets lost in a simulation environment. Providing guidance requires an image of what the learner is doing. Acquiring this image by diagnosing the behaviour of the learner is a complex and resource-intensive task for which yet no general approach exists. In this book, we apply existing ideas and techniques from the field of model-based reasoning and diagnosis to interactive learning environments. We present a framework for subject matter modelling and diagnosis of learner behaviour. The framework defines generic techniques for automatically generating subject matter models from qualitative simulations. A generic model-based engine employs these models for diagnosing the learner's behaviour. The framework provides a powerful and reusable approach to individualising guidance in educational systems.

Poetry. "Ode to certain interstates," the thirteen-part poem of this collection, was inspired by the year poet Howard W. Robertson worked as a long-haul truck driver in the American West and British Columbia. In between pauses at truck stops and rest areas, the author meditates on (among other matters) Kant, the Kalapuyans, Basho, and the "best buffet in the West." The eight additional poems in the book, such as "Ode to this small stick" and "The transcendental laughter of Eleanor," use a refined intelligence to probe the daily intersections of the sacred and banal. Howard W. Robertson is a retired research librarian. In 2003, he was awarded the Robinson Jeffers Tor House Prize for Poetry.
