The reality of espionage isn't easily disentangled from its mythology – and somewhere at the uneasy confluence of these dimensions is the fiction of John le Carr é. A former British intelligence officer, le Carr é has captured the shadows and textures of the covert world with a sure eye for its nuances and a deep appreciation of

---

the human factor. And while intelligence work may be far removed from the experiences of most of us, its grand themes – loyalty and betrayal – touch everyone. In *Le Carré's Landscape* Tod Hoffman, a former intelligence officer, offers a unique perspective on *le Carré's* work. He juxtaposes his own experiences and extensive research with *le Carré's* fiction, shedding light on those dank recesses where spying is done. Taking the reader through the countries and continents of *le Carré's* fiction, Hoffman reflects on the political causes and personal effect of spying – secrecy, manipulation, deceit, treason. *Le Carré's Landscape* is a unique look at the master of the spy genre – a man who has captured the imaginations of millions of readers and perhaps enticed more than a few into the real world of espionage.

"This publication concerns large-scale urban area development in general, and in particular with gaining an understanding of the role

---

played by global-local interaction in shaping the area development strategies in one particularly explosive urban project, the development of Shanghai's Pudong New Area. The Pudong development provides an extreme example of a situation in which interaction between global and local forces took place in a location whose boundaries had been closed to the outside world for almost forty years and in a period when doors and windows were beginning to open. The research led to a concrete interpretation of the tensions developing at district level and provided an example capable of representing the complexity and dynamics of current area developments. The practical question addressed by the research was: What were the main factors responsible for the speed achieved by the Pudong development? The associated theoretical question was: To what extent did the development of the Pudong New Area reflect the

characteristics of a developmental state?"

Since the advent of digitization, the conceptual confusion surrounding the semantic galaxy that comprises the media and journalism universes has increased. Journalism across several media platforms provides rapidly expanding content and audience engagement that assist in enhancing the journalistic experience. Exploring Transmedia Journalism in the Digital Age provides emerging research on multimedia journalism across various platforms and formats using digital technologies. While highlighting topics, such as immersive journalism, nonfictional narratives, and design practice, this book explores the theoretical and

In the fall of 1955, Bernard Cornfeld arrived in Paris with scant money in his pocket and a tenuous relationship with a New York firm to sell mutual funds overseas. Cornfeld, a former psychologist and social worker, knew how to make friends fast and soon targeted two groups of people who could help him fulfill his economic ambitions: American expatriates who were

looking to build their own fortunes and servicemen abroad who loved to live high-rolling lives and spend money. Cornfeld built a multi-billion-dollar and multi-national company, famous for a winning one-line pitch: "Do you sincerely want to be rich?"

The open source nature of the platform has not only established a new direction for the industry, but enables a developer or forensic analyst to understand the device at the most fundamental level. *Android Forensics* covers an open source mobile device platform based on the Linux 2.6 kernel and managed by the Open Handset Alliance. The Android platform is a major source of digital forensic investigation and analysis. This book provides a thorough review of the Android platform including supported hardware devices, the structure of the Android development project and implementation of core services (wireless communication, data storage and other low-level functions). Finally, it will focus on teaching readers how to apply actual forensic techniques to recover data. Ability to

The computing world today is in the middle of a revolution: mobile clients and cloud computing have emerged as the dominant paradigms driving programming and hardware innovation today.

The Fifth Edition of Computer Architecture focuses on this dramatic shift, exploring the ways in which software and technology in the cloud are accessed by cell phones,

tablets, laptops, and other mobile computing devices. Each chapter includes two real-world examples, one mobile and one datacenter, to illustrate this revolutionary change. Updated to cover the mobile computing revolution Emphasizes the two most important topics in architecture today: memory hierarchy and parallelism in all its forms. Develops common themes throughout each chapter: power, performance, cost, dependability, protection, programming models, and emerging trends ("What's Next") Includes three review appendices in the printed text. Additional reference appendices are available online. Includes updated Case Studies and completely new exercises.

Antistatic sprays from several different manufacturers are

---

examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these

sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. *Lexus: The Relentless Pursuit* reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since

the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue. Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA supercar. Offers important business lessons for brand managers and executives. For car enthusiasts, business leaders, and anyone interested in branding and marketing, *Lexus: The Relentless Pursuit* offers an amazing story of excellence and innovation in the automotive industry.

Hypertext was going to revolutionize the very way in which we read and write. However, while hypertext's non-linearity has been embraced by enthusiasts keen to experiment with interactive literary genres, to date, the non-linear medium has made little

---

impact on scholarly discourse and argumentation, which have traditionally heavily relied on linearity. Is this because hypertextual narrative is simply incompatible with the requirements of certain genres? Or could it be that hypertext's essential characteristics have yet to be fully understood and exploited? Cinematic Hypertext is for theorists and designers ready to consider a new paradigm for framing the medium and its characteristics: film. Clara Mancini guides the reader through an eclectic mix of ideas from technology, psycholinguistics, visual design, narratology and film theory. En route, Cinematic Hypertext offers an intellectual

workout for media theorists and coherence relations scholars, with analyses of cinematic grammars, film clips, hypertexts, and hypertext systems, grounded in an underlying theory of Cognitive Coherence Relations. Those ready to build experimental systems will find design principles and guidelines, and the evidence reported will be of particular interest to those wondering if the theory behind cinematic hypertext is valid empirically. The result is a novel way of thinking about hypertext which complements existing hypertext paradigms, with Mancini inviting the reader to design hypertexts capable of communicating through a visual language

Simulators are becoming standard equipment for

interactive learning environments. They allow for attractive teaching with a large degree of freedom for the learner. However, without proper guidance, the learner easily gets lost in a simulation environment. Providing guidance requires an image of what the learner is doing. Acquiring this image by diagnosing the behaviour of the learner is a complex and resource-intensive task for which yet no general approach exists. In this book, we apply existing ideas and techniques from the field of model-based reasoning and diagnosis to interactive learning environments. We present a framework for subject matter modelling and diagnosis of learner behaviour. The framework defines generic techniques for automatically generating subject matter models from qualitative simulations. A
