The reality of espionage isn't easily disentangled from its mythology – and somewhere at the uneasy confluence of these dimensions is the fiction of John le Carré. A former British intelligence officer, le Carré has captured the shadows and textures of the covert world with a sure eye for its nuances and a deep appreciation of the human factor. And while intelligence work may be far removed from the experiences of most of us, its grand themes – loyalty and betrayal – touch everyone. In *Le Carré's Landscape* Tod Hoffman, a former intelligence officer, offers a unique perspective on le Carré's work. He juxtaposes his own experiences and extensive research with le Carré's fiction, shedding light on those dank recesses where spying is done. Taking the reader through the countries and continents of le Carré's fiction, Hoffman reflects on the political causes and personal effect of spying – secrecy, manipulation, deceit, treason. *Le Carré's Landscape* is a unique look at the master of the spy genre – a man who has captured the imaginations of millions of readers and perhaps enticed more than a few into the real world of espionage.

Poetry. "Ode to certain interstates," the thirteen-part poem of this collection, was inspired by the year poet Howard W. Robertson worked as a long-haul truck driver in the American West and British Columbia. In between pauses at truck stops and rest areas, the author meditates on (among other matters) Kant, the Kalapuyans, Basho, and the "best buffet in the West." The eight additional poems in the book, such as "Ode to this small stick" and "The transcendental laughter of Eleanor," use a refined intelligence to probe the daily intersections of the sacred and banal. Howard W. Robertson is a retired research librarian. In 2003, he was awarded the Robinson Jeffers Tor House Prize for Poetry.

"This publication concerns large-scale urban area development in general, and in particular with gaining an understanding of the role played by global-local interaction in shaping the area development strategies in one particularly explosive urban project, the development of Shanghai's Pudong New Area. The Pudong development provides an extreme example of a situation in which interaction between global and local forces took place in a location whose boundaries had been closed to the outside world for almost forty years and in a period when doors and windows were beginning to open. The research led to a concrete interpretation of the tensions developing at district level and provided an example capable of representing the complexity and dynamics of current area developments. The practical question addressed by the research was: What were the main factors responsible for the speed achieved by the Pudong development? The associated theoretical question was: To what extent did the development of the Pudong New Area reflect the characteristics of a developmental state?"

Mobile phone forensics is the science of recovering digital evidence from a mobile phone under forensically sound conditions using accepted methods. Mobile phones, especially those with advanced capabilities, are a relatively recent phenomenon, not usually covered in classical computer forensics. This guide attempts to bridge that gap by providing an in-depth look into mobile phones and explaining the technologies involved and their relationship to forensic procedures. It covers phones with features beyond simple voice communication and text messaging and their technical and operating characteristics. This guide also discusses procedures for the preservation, acquisition, examination, analysis, and reporting of digital information present on cell phones, as well as available forensic software tools that support those activities.

How to Personalize Learning John Wiley & Sons
In the fall of 1955, Bernard Cornfeld arrived in Paris with scant money in his pocket and a tenuous relationship with a New York firm to sell mutual funds overseas. Cornfeld, a former psychologist and social worker, knew how to make friends fast and soon targeted two groups of people who could help him fulfill his economic ambitions: American expatriates who were looking to build their own fortunes and servicemen abroad who loved to live high-rolling lives and spend money. Cornfeld built a multi-billion-dollar and multi-national company, famous for a winning one-line pitch: "Do you sincerely want to be rich?"

The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

A Seniors Guide to iPhone 13 Elsevier

Learn how to use the iPhone 13 Remember when phones actually called people? They still do that, obviously, but they do so much more today! They keep track of your health. They help you stay in touch with your family in innovative ways. They let you watch movies. And, for some of us, they let us play games while we are supposed to be doing something else! Mostly, they make the things we do every day a little easier-and that's especially true on the iPhone 12 and iPhone 13 Pro. You probably know some of the many things the iPhone does, but do you know how to actually do them? This guide will show you features you might not even know about, and, of course, how to use them. Along the way, I try to keep things on the lighthearted side-my intent is not to give you a stuffy technical guide that can also be used as a doorstop, but to help you enjoy learning and make you excited about all the things you can do. Some of the things you will learn in this book include: What's new to iOS 15 Using an iPhone that doesn't have a Home button Using Face ID Cinematic Mode AirTags How to use Picture in Picture for movies and TV shows How to add widgets to your Home screen Organizing apps with the App Library Buying, removing, rearranging, updating apps MagSafe Taking, editing, organizing and sharing photos Apple Services (Apple Music, Apple TV+, Apple Card, iCloud, and Fitness+) Using Siri Using pre-installed apps like Notes, Calendar, Reminders, and more Making phone calls and sending messages And much, much more! Are you ready to start enjoying your new iPhone? Then let's get started! Note: This book is not endorsed by Apple, Inc and should be considered unofficial.
