### *We Had It So Good* Routledge

This book offers a thorough appraisal of Operation Allied Force, NATO's 78-day air war to compel the president of Yugoslavia, Slobodan Milosevic, to end his campaign of ethnic cleansing in Kosovo. The author sheds light both on the operation's strengths and on its most salient weaknesses. He outlines the key highlights of the air war and examines the various factors that interacted to induce Milosevic to capitulate when he did. He then explores air power's most critical accomplishments in Operation Allied Force as well as the problems that hindered the operation both in its planning and in its execution. Finally, he assesses Operation Allied Force from a political and strategic perspective, calling attention to those issues that are likely to have the greatest bearing on future military policymaking. The book concludes that the air war, although by no means the only factor responsible for the allies' victory, certainly set the stage for Milosevic's surrender by making it clear that he had little to gain by holding out. It concludes that in the end, Operation Allied Force's most noteworthy distinction may lie in the fact that the allies prevailed despite the myriad impediments they faced.

Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson

spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, *Hell's Angels* is a gripping portrait, and the best account we have of the truth behind an American legend.

This, the 30th edition of the "United States Government Printing Office Style Manual," is the first revision to this authoritative style manual since 2002. The "GPO Style Manual, as it is popularly known, is issued under the authority of section 1105 of Title 44 U.S.C., which requires the Public Printer, as head of the GPO to "determine the form and style in which the printing...ordered by a department is executed...having proper regard to economy, workmanship, and the purposes for which the work is needed." The Manual is prepared by the GPO Style Board, composed of proofreading, printing, and Government documents specialists from within GPO, where all congressional publications, and many other key Federal Government documents are prepared. The first "GPO Style Manual" appeared in 1894. It was developed originally as a printer's stylebook to standardize word and type treatment and remains so today. Through successive editions, however, the "GPO Style Manual" has come to be widely recognized by writers and editors both within and outside the Federal Government as one of the most useful resources in the editorial arsenal. This new, revised version of the "GPO Style Manual" has been thoroughly redesigned to make it more modern and easier to read, and the content has been updated generally throughout in keeping with current

usage.

way, a wrong way, and a way so monumentally complex, excessive, and inadvisable that no one would ever try it. *How To* is a guide to the third kind of approach. It's full of highly impractical advice for everything from landing a plane to digging a hole. Bestselling author and cartoonist Randall Munroe explains how to predict the weather by analyzing the pixels of your Facebook photos. He teaches you how to tell if you're a baby boomer or a 90's kid by measuring the radioactivity of your teeth. He offers tips for taking a selfie with a telescope, crossing a river by boiling it, and powering your house by destroying the fabric of space-time. And if you want to get rid of the book once you're done with it, he walks you through your options for proper disposal, including dissolving it in the ocean, converting it to a vapor, using tectonic plates to subduct it into the Earth's mantle, or launching it into the Sun. By exploring the most complicated ways to do simple tasks, Munroe doesn't just make things difficult for himself and his readers. As he did so brilliantly in *What If?*, Munroe invites us to explore the most absurd reaches of the possible. Full of clever infographics and fun illustrations, *How To* is a delightfully mind-bending way to better understand the science and technology underlying the things we do every day.

**Lessons From Lucy** Penguin

In this "little gem" (*Washington Independent Review of Books*), Pulitzer Prize-winning columnist and *New York Times* bestselling author Dave Barry learns how to age happily from his old but joyful dog, Lucy. As Dave Barry turns seventy—not happily—he realizes that his dog, Lucy, is dealing with old age far better than he is. She has more friends, fewer worries, and way more fun. So Dave decides to figure out how Lucy manages to stay so happy, to see if he can make his own life happier by doing the things she does (except for drinking from the toilet). He reconnects with old friends and tries to make new ones—which turns out to be a struggle, because Lucy likes people a lot more than he does. And he gets back in touch with two ridiculous but fun groups from his past: the Lawn Rangers, a group of guys who march in parades pushing lawnmowers and twirling brooms (alcohol is involved), and the Rock Bottom Remainers, the world's oldest and least-talented all-author band. With each new lesson, Dave riffs hilariously on dogs, people, and life in general, while also pondering Deep Questions, such as when it's okay to lie. (Answer: when scallops are involved.) *Lessons From Lucy* shows you a new side to Dave Barry that's "touching and sentimental, but there's still a laugh on every page" (*The Sacramento Bee*).

The master humorist has written a witty and affable guide to joyous living at any age.

America is on the brink of a green energy revolution that can save the planet, and increase peace and prosperity, by harnessing the unlimited solar power. After decades of promise, the technology for alternative energy solutions now exists to replace our dangerous addiction to fossil fuels with cheap, clean solar energy. Neville

Williams has been on the leading edge of this revolution for decades and knows from firsthand experience how sun power can transform lives and communities for the better. He has traveled the globe bringing solar-generated electricity to struggling communities throughout Asia, Africa, India, and the developing world. From isolated villages high in the mountains of Nepal to remote settlements in South Africa, Williams has worked to bring sun power to even the most off-the-grid reaches of the planet. He has brought that knowledge and experience back to America where he founded one of the country's fastest growing solar companies. If millions of poor families in the Third World can get their power from the sun, why can't Americans concerned with their rising power bills, dependence on foreign oil, and carbon footprints do the same? The answer is that sun power is here, it works, and can light up a new era of economic and environmental security—if we have the will to seize this historic opportunity. This book is not about predictions or promises. It's about what's happening now, all over the world, and what still needs to be done.
