1985-2006 Haynes Manuals N. America, Incorporated

A fascinating and nostalgic compilation of rider profiles written over a three year period, which originally appeared in

Classic Motorcycle magazine, and is now

accompanied by a new set of over 100

photographs. All of the riders featured

became top achievers in their field,

although, for some, it was their first

interview. During the 1950s and 60s,

scrambling especially drew huge crowds to

meetings all across the country, and, thanks

to TV coverage such as BBC Grandstand

Trophy, and ITV's World of Sport, many of

the competitors featured in this book

became household names. Each chapter

includes the competition years of the riders,

and also gives an overview of their careers,

and conveys their enthusiasm for the sport.

A Field Manual for Railroad Engineers

Haynes Manuals N. America, Incorporated

Revised and fully updated, the second edition of this graduate textbook offers a comprehensive explanation of the technology and physics of LEDs such as infrared, visible-spectrum, ultraviolet, and white LEDs made from III-V semiconductors. Elementary properties such as electrical and optical characteristics are reviewed, followed by the analysis of advanced device structures. With nine additional chapters, the treatment of LEDs has been vastly expanded, including new material on device packaging, reflectors, UV LEDs, III-V nitride materials, solid-state sources for illumination applications,

and junction temperature. Radiative and non-radiative recombination dynamics, methods for improving light extraction, high-efficiency and high-power device designs, white-light emitters with wavelength-converting phosphor materials, optical reflectors, and spontaneous recombination in resonant-cavity structures are discussed in detail. With exercises, solutions, and illustrative examples, this textbook will be of interest to scientists and engineers working on LEDs and graduate students in electrical engineering, applied physics, and materials science.
