Manual Focus Lenses for Video: Which Work

Best for You and ... itself.

All lenses used to be manual before digital photography came along; it was the norm to manually set your aperture and manually focus your shot. A lot of cameras coming out now have the ability to accept adapters that allow you to put on whatever lens you like, though this means you lose the ability to auto focus or set the aperture through the camera

How to Use a Manual Lens - PictureCorrect  
There are great companies that produce MFT lenses, too. Lenses made by Schneider, Voigtlander, Tamron, Sigma, SLR Magic, and Mitakon also provide same functionality you'd get from first-party lenses. To sum it up, if you're shooting more videos, then you should consider the Panasonic glass lenses as they are tailored to video shooting.
