Online dating has become a widespread feature of modern social life. In less than two decades, seeking partners through commercial intermediaries went from being a marginal and stigmatized practice to being a common activity. How can we explain this rapid change and what does it tell us about the changing nature of love and sexuality? In contrast to those who praise online dating as a democratization of love and those who condemn it as a commodification of intimacy, this book tells a different story about how and why online dating became big. The key to understanding the growing prevalence of digital dating lies in what Marie Bergström calls "the privatization of intimacy." Online dating takes courtship from the public to the private sphere and makes it a domestic and individual practice. Unlike courtship in traditional settings such as school, work, and gatherings of family and friends, online dating makes a clear distinction between social and sexual sociability and renders dating much more discrete. Apparently banal, this privatizing feature is fundamental for understanding both the success and the nature of digital matchmaking. Bergström also sheds light on the persisting inequalities of intimate life, showing that online dating is neither free nor fair: it has its winners and losers and it differs significantly according to gender, age and social class. Drawing on a wide range of empirical material, this book challenges what we think we know about online dating and gives us a new understanding of who, why, and how people go online to seek sex and love.

With Languages in Mind: Musings of a Polyglot David and Charles

Scholars and professionals from all over the world, across experience levels and the gender and sexuality spectrum, share experiences and analysis of romance and sexuality in video games. Whether discussing casual sex in the Star Wars universe; analyzing various Otome games; examining "the gaze" in various games; player romance behavior in games; or exploring the ethical ramifications of sexuality in virtual reality and other emerging technologies, this book discusses what players want in video game romance, and how developers can best deliver it. Key Features: Examines the past, present, and future of romance in single-player, role-playing games Discusses common presentations of romance in single-player, role-playing games—both in the category and game mechanics that drive romance Discusses research on how players define a satisfying game romance and what specific steps narrative designers can take to design satisfying games Explains the notion of the empathic game and explores its importance in relation to romance in game design

Product Lifecycle Management in the Digital Twin Era Springer Nature

Kató Lomb (1909 – 2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. In 'With Languages in Mind', originally published in Hungary as 'Nyelvekről jut eszembe...' (1983), Dr. Lomb presents her views on subjects ranging from language differences, language use, the inherent compromises in interpreting, and language learning. --

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Since its recent introduction, the ZigBee protocol has created an enormous amount of buzz in venues from magazine covers to trade show floors to water coolers. Its promise of providing a simpler, cheaper, more power-efficient WPAN (Wireless Personal Area Network) alternative to WiFi and Bluetooth has opened up new data collection possibilities in application areas from industrial controls to medical devices to intruder alarms. Yet, despite this widespread interest, there is still little information available that goes beyond detailing the spec itself. Missing from the current ZigBee lexicon is practical, application-oriented guidance from an expert, specifically geared to aid engineers in implementing this new technology. Enter respected designer and popular columnist Fred Eady! With his new book, Hands-On ZigBee, he provides the only comprehensive how-to ZigBee guide available. - The ONLY one-stop Zigbee resource available- from basics to sniffers to specs - 7 easy-to-assemble

ZigBee projects allow the reader to follow along...hands-on! - Working hardware and software examples included in every chapter

Retailing in the 21st Century Springer Science & Business Media

A comprehensive introduction to research methods in business for students planning or undertaking a dissertation or extensive research project in business and management. The fifth edition of Research Methods for Business Students brings the theory, philosophy and techniques of research to life and enables students to understand the practical relevance of the research methods. A highly accessible style and logical structure have made this the student choice' and run-away market leader. The book is written for students on undergraduate and postgraduate degree programmes in business, or business-related disciplines. The following online resources support the text:

*For Students: self-assessment questions, glossary, revision flashcards, tutorials for SPSS and NVivo, plus Smarter Online Searching Guide * For Instructors: teaching manual, powerpoint slides, testbank.

Citroen C3 New York : Random House

With crisp and insightful contributions from 47 of the world's leading experts in various facets of retailing, Retailing in the 21st Century offers in one book a compendium of state-of-the-art, cutting-edge knowledge to guide successful retailing in the new millennium. In our competitive world, retailing is an exciting, complex and critical sector of business in most developed as well as emerging economies. Today, the retailing industry is being buffeted by a number of forces simultaneously, for example the growth of online retailing and the advent of 'radio frequency identification' (RFID) technology. Making sense of it all is not easy but of vital importance to retailing practitioners, analysts and policymakers.

Starting in 1956 when Ford officially entered motor racing, this book takes the reader on a journey of how and why things happened the way they did. Who were the personalities behind the all the different Ford GT development programs, old and new.

Embodied Minds--technical Environments John Wiley & Sons

This book investigates the role that foreign direct investment (FDI) in central-eastern and southern Europe has played in the post-crisis period, comparing patterns across countries and sectors. An overarching objective of this publication is to assess the extent to which FDI can still be seen as a key driver of economic development, modernisation and convergence for Europe's low- and middle-income economies, taking into account also the risks and limiting factors associated with FDI.

British Book News Haynes Manuals

As we speak, stunning new snapshots of our Solar System are being transmitted to Earth by a fleet of space probes, landers, and rovers. Yet nowadays, it is all too easy to take such images for granted amidst the deluge of competing visuals we scroll through every day. To truly understand the value of these incredible space photos, we first need to understand the tools that made them possible. This is the story of imaging instruments in space, detailing all the technological missteps and marvels that have allowed us to view planetary bodies like never before. From the rudimentary cameras launched in the 1950's to the cutting-edge imaging instruments onboard the Mars Perseverance rover, this book covers more than 100 imaging systems sent aboard various spacecraft to explore near and distant planetary bodies. Featured within are some of the most striking images ever received by these pioneering instruments, including Voyager's Pale Blue Dot, Apollo's Blue Marble, Venera's images from the surface of Venus, Huygens' images of Titan, New Horizon's images of Pluto and Arrokoth, and much more. Along the way, you will learn about advancements in data transmission, digitization, citizen science, and other fields that revolutionized space imaging, helping us peer farther and more clearly across the Solar System.

Drum Renniks Publications

Displaying a talent for combining aesthetic sensibility with scientific rigor, the author has given new life to something that once excited European passions: an original, non-academic art at the forefront of the 'new technology' of the time. For decades, aristocrats of the Old World and then American collectors (the latter at the end of the eighteenth and beginning of the nineteenth centuries) spent countless sums on the purchase of these works, which were worth a fortune. These wealthy collectors of curiosities of all types were also most certainly great dreamers seeking a worthy setting for their dreams. Unbeknownst to them, their endeavours had much greater scope, creating and nourishing the conditions for a rare encounter between two worlds: a golden age of atypical collaboration, a combined adventure between China and Europe.
