Do your kids love animals? Elliot takes on an adventure following a group of raccoons all around Sag Harbor the night before the town's annual HarborFest celebrations. He watches the plump little comedians feast on a buffet of discarded food as they run from place to place, leaving messes in their wake. If only the owners of those trash bins learned what Elliot had learned from a wildlife expert at school. Elliot is just a secret observer until he has the chance to help and forms a bond with the adorable group of raccoons! Funny and empowering, the Elliot's Adventures children's books are an ode to loving the world we live in by respecting nature and wildlife. The stories are designed to stimulate children's imaginations and encourage unstructured outdoor play at a time when kids are spending more hours than ever behind a screen each day. A mother and son collaboration, this series is a celebration of parents and children everywhere. A perfect book for parents and kids who: - Enjoy silly adventures- Love to learn about animals- Care about the environment- Want to protect wildlife- Believe kids can make a difference.

Although economic, cultural and demographic changes are part and parcel of the modern world, changes in a number of areas have

accelerated in the last quarter-century – a period sometimes spoken of as the global information society, a world of ‘liquid modernity’ – or of fully-fledged global neoliberalism associated with deregulation, flexible accumulation and financialisation. At a global level, some of the substantial areas where change has accelerated are, apart from the spectacular spread of new information technology, tourism, foreign direct investment, urbanisation, resource extraction through mining, energy use, species extinction, displacement, and international trade. These and other changes are, needless to say, perceived and acted upon differently in different countries and localities, and in order to understand the implications of the present acceleration of history, they have to be explored locally. This book gives a compelling perspective on the contemporary, ‘overheated’ world, presenting ethnographic material from many countries and weaving the local and particular together with large-scale global acceleration. This book was first published as a special issue of History and Anthropology.

This volume is about Pope Francis, the diplomat. In his eight years of pontificate, Pope Francis as a peacemaker has propagated the ideas of human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a peaceful journey of human beings. The book analyses his speeches, and meetings as a diplomat of peace, including his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men 's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ' tradition ' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men 's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Ressentiment—the hateful desire for revenge—plays a pivotal role in Nietzsche 's On the Genealogy of Morals. Ressentiment explains the formation of bad conscience, guilt, asceticism, and, most importantly, it motivates the "slave revolt" that gives rise to Western morality 's values. Ressentiment, however, has not enjoyed a thorough treatment in the secondary literature. This book brings it sharply into focus and provides the first detailed examination of Nietzsche 's psychology of ressentiment. Unlike other books on the Genealogy, it uses ressentiment

as a key to the Genealogy and focuses on the intriguing relationship between resentment and justice. It shows how of the biggest games of the past year and the new ones coming in 2018. In this breakthrough student resource, two committed, tech-savvy professors, Deborah Licht and Misty Hull, combine years of research and teaching insights with the journalistic skill of science writer, Coco Ballantyne, who came to the project directly from Scientific American. Together, they have created an introductory psychology textbook and online learning and comprehension system that draws on written profiles and video interviews of 26 real people to help students better understand, remember, apply, and relate to psychology's foundational concepts and ideas. Beautifully designed, the printed text is filled with high-interest examples and features, including full-page infographics that help students understand and retain key concepts. Online, additional author-created resources, including scaffolded activities and adaptive quizzes, provide a seamless learning experience for students and a reliable assessment mechanism for instructors and programs. This innovative collaboration between Worth Publishers and Scientific American reflects a commitment to engaging and educating all students, including those who sometimes seem difficult to engage—in the contemporary style of the world's most respected science magazine. Along with student engagement with the personal stories, Presenting Psychology 2e also aims to: Demonstrate that psychology is a science Help students see the "big picture" Provide high-quality accessible visuals that make a difference! Illustrate real-world applications Maintain a positive perspective of psychology Emphasize gender and cultural diversity Help dispel myths Provide quality assessments Create interactive, technology-based learning that appeals to students

If you want to learn about Neural Networks then keep reading... Aladdin from "The Arabian Nights" had a magic lamp that fulfilled his every wish when rubbed. Today we have a smartphone that serves as a window to a whole universe of knowledge, entertainment and even wise personal assistants, such as Siri - all we have to do is rub the screen. Aladdin's lamp was powered by a genie, but what powers Siri? Neural networks. It's an astounding concept that tries to mimic the way living brains work by amalgamating human and machine ways of thinking. The goal of this book is to present the reader with a digestible, readable explanation of neural networks while keeping the underlying concepts intact. The reader will acquire fundamental knowledge of neural networks through loosely related chapters that nonetheless reference terms and ideas mentioned throughout the book. The book itself isn't meant to be strictly academic, but a blend of colloquial and technical that brings this exciting, yet eerie, topic to the widest swath of the general public. There is a lot of coding and math behind neural networks, but the reader is presumed to have no prior knowledge or interest in either, so the concepts are broken down and elaborated on as such. Each chapter is made as standalone as possible to allow the reader to skip back and forth without getting lost, with the glossary at the very end serving as a handy summary. Where possible, references have been included to support the presented conclusions and encourage the reader to scrutinize the traditional media in search of clues. Neural Networks: An Essential Beginners Guide to Artificial Neural Networks and their Role in Machine Learning and Artificial Intelligence cover topics such as: Programming a smart(er) computer Composition Giving neural networks legs to stand on The magnificent wetware Personal assistants Tracking users in the real world Self-driving neural networks Taking everyone's job Quantum leap in computing Attacks on neural networks Neural network war Ghost in the machine No backlash And Much, Much More So if you want to learn about Neural Networks without having to go through heavy textbooks, click "add to cart"!

Electrical codes, standards, recommended practices and regulations can be complex subjects, yet are essential in both electrical design and life safety issues. This book demystifies their usage. It is a handbook of codes, standards, recommended practices and regulations in the United States involving electrical safety and design. Many engineers and electrical safety professionals may not be aware of all of those documents and their applicability. This book identifies those documents by category, allowing the ready and easy access to the relevant requirements. Because these documents may be updated on a regular basis, this book was written so that its information is not reliant on the latest edition or release of those codes, standards, recommended practices or regulations. No single document on the market today attempts to not only list the majority of relevant electrical design and safety codes, standards, recommended practices and regulations, but also explain their use and updating cycles. This book, one-stop-information-center for electrical engineers, electrical safety professionals, and designers, does. Covers the codes, standards, recommended practices and regulations in the United States involving electrical safety and design, providing a comprehensive reference for engineers and electrical safety professionals Documents are identified by category, enabling easy access to the relevant requirements Not version-specific; information is not reliant on the latest edition or release of the codes, standards, recommended practices or regulations
