Producing Videos has been called the 'bible' of video making. A bestseller over many years, it offers a comprehensive and user friendly guide to all aspects of video production - from the first chapter on using a camera (if it doesn't go in easily, don't force it) to the chapter on distribution (no matter what happens, always hold onto your master). All the elements of video production are covered: camera operation; scriptwriting; composition; budgeting; preproduction planning; lighting and sound recording; interview techniques; field production and studio shoots; digital editing; digital postproduction techniques; video streaming and other forms of online distribution. This edition has been fully revised and updated to cover developments in technology, promotion and distribution. It includes tips from over 120 experienced video teachers from around the world, and is illustrated with over 600

photographs and 200 diagrams. Producing Videos is the best handbook available for learning the basics of video making. It is an ideal guide for students, and for anyone who has a flip camera burning a hole in their pocket and aspirations to become the next hot new director. 'Whether you are a beginner or veteran filmmaker, Martha Mollison's Producing Videos serves as a comprehensive guide to all aspects of video production.' - Greg Walters, Portland Community College 'An invaluable resource for developing my students' video journalism skills.' - Kay Nankervis, Charles Sturt University

Attack of the Killer Video Book Vertebrate Publishing Amber is the collective name for a suite of programs that allow users to carry out molecular dynamics simulations, particularly on biomolecules. None of the individual programs carries this name, but the various parts work reasonably well together, and provide a powerful framework for many common calculations. The term Amber is also used to refer to the empirical force fields that are implemented here. It should be recognized, however, that the code and force field are separate: several other computer packages have implemented the Amber force fields, and other force fields can be implemented with the Amber programs. Further, the force fields are in the public domain, whereas

the codes are distributed under a license agreement. The Amber software suite is divided into two parts: AmberTools21, a collection of freely available programs mostly under the GPL license, and Amber20, which is centered around the pmemd simulation program, and which continues to be licensed as before, under a more restrictive license. Amber20 represents a significant change from the most recent previous version, Amber18. (We have moved to numbering Amber releases by the last two digits of the calendar year, so there are no odd-numbered versions.) Please see <https://ambermd.org> for an overview of the most important changes. AmberTools is a set of programs for biomolecular simulation and analysis. They are designed to work well with each other, and with the "regular" Amber suite of programs. You can perform many simulation tasks with AmberTools, and you can do more extensive simulations with the combination of AmberTools and Amber itself. Most components of AmberTools are released under the GNU General Public License (GPL). A few components are in the public domain or have other open-source licenses. See the README file for more information.

In recent years announcements of the birth of business anthropology have ricocheted around the globe. The first major reference work on this

field, the Handbook of Anthropology in Business is a creative production of more than 60 international scholar-practitioners working in universities and corporate settings from high tech to health care. Offering broad coverage of theory and practice around the world, chapters demonstrate the vibrant tensions and innovation that emerge in intersections between anthropology and business and between corporate worlds and the lives of individual scholar-practitioners. Breaking from standard attempts to define scholarly fields as products of fixed consensus, the authors reveal an evolving mosaic of engagement and innovation, offering a paradigm for understanding anthropology in business for years to come.
