The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

This paper describes economic developments in Grenada during the 1990s. The weak growth performance since 1990 reflected largely a continuous contraction in agricultural output, which declined each year from 1989 to 1993. The construction industry experienced a major contraction in 1992 owing to the sharp fall in public investment. In 1993, output declined in the mining and quarrying, construction, and manufacturing sectors as well as in agriculture. In contrast, the hotel and restaurant sector has exhibited strong growth since the late 1980s, with real value added growing by 13.8 percent, on average, each year since 1989.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

"The authors test whether poor households use cash transfers to invest in income generating activities that they otherwise would not have been able to do. Using data from a controlled randomized experiment, they find that transfers from the Oportunidades program to households in rural Mexico resulted in increased investment in micro-enterprise and agricultural activities. For each peso transferred, beneficiary households used 88 cents to purchase consumption goods and services, and invested the rest. The investments improved the household's ability to generate income with an estimated rate of return of 17.55 percent, suggesting that these households were both liquidity and credit constrained. By investing transfers to raise income, beneficiary households were able to increase their consumption by 34 percent after five and a half years in the program. The results suggest that cash transfers to the poor may raise long-term living standards, which are maintained after program benefits end."--World Bank web site.

Much as we love reading about the latest hypercar or money-no-object custom project, we believe vehicles owned - and loved - by gearheads like us are just as meaningful, if not moreso. Our readers are self-made. We buy vehicles for specific reasons and we learn how to maintain, modify, and repair them ourselves. (With a little help from our friends, of course!) Everyone you meet in an issue of Gearbox Magazine is cool. If you spotted them in a parking lot, you could walk right up to them and strike up a conversation. And chances are you might end up lifelong friends. We're not looking to get rich and forget our roots. We're trying to make a few bucks so we can spend more time helping gearheads build high performance machines & lives. This issue isn't perfect, but neither are our daily drivers. We hope you'll grab a copy and tell a couple friends about us. Thanks for checking us out. GBXM-united. Better living through busted knuckles.

on two residencies, at the Institute of Astronomy in Cambridge and the London Mathematical Society, both of which stretched my artistic language and enabled me to make sculpture for the first time. When I began collecting images for this book, a clearer vision became apparent." - Mark Francis.
