"With the nuance of a reporter and the pace of a thriller writer, Andy Greenberg gives us a glimpse of the cyberwars of the future while at the same time placing his story in the long arc of Russian and Ukrainian history."

—Anne Applebaum, bestselling author of *Twilight of Democracy* The true story of the most devastating act of cyberwarfare in history and the desperate hunt to identify and track the elite Russian agents behind it: "[A] chilling account of a Kremlin-led cyberattack, a new front in global conflict" (Financial Times). In 2014, the world witnessed the start of a mysterious series of cyberattacks. Targeting American utility companies, NATO, and electric grids in Eastern Europe, the strikes grew ever more brazen. They

culminated in the summer of 2017, when the malware known as NotPetya was unleashed, penetrating, disrupting, and paralyzing some of the world's largest businesses—from drug manufacturers to software developers to shipping companies. At the attack's epicenter in Ukraine, ATMs froze. The railway and postal systems shut down. Hospitals went dark. NotPetya spread around the world, inflicting an unprecedented ten billion dollars in damage—the largest, most destructive cyberattack the world had ever seen.

---

The hackers behind these attacks are quickly gaining a reputation as the most dangerous team of cyberwarriors in history: a group known as Sandworm. Working in the service of Russia's military intelligence agency, they represent a persistent, highly skilled force, one whose talents are matched by their willingness to launch broad, unrestrained attacks on the most critical infrastructure of their adversaries. They target government and private sector, military and civilians alike. A

chilling, globe-spanning detective story, Sandworm considers the danger this force poses to our national security and stability. As the Kremlin's role in foreign government manipulation comes into greater focus, Sandworm exposes the realities not just of Russia's global digital offensive, but of an era where warfare ceases to be waged on the battlefield. It reveals how the lines between digital and physical conflict, between wartime and peacetime, have begun to blur—with world-shaking implications. **Chilton's Repair and Tune-up Guide: Jeep**

Even before work on the first phase of the New Town was completed, visitors were recording their very favourable impressions. An English tourist, Robert Heron, writing at the end of the 1790s, wrote that: "With regard to the buildings that have of late arisen in this City (Edinburgh) with

such incredible rapidity, we may venture to say, that, in regularity and magnificence, they are scarcely equalled, or at least not excelled, by any in Europe...When Charlotte Square, at the west end of George Street, shall be completed, this City will certainly surpass, in regularity and magnificence, every other in Great Britain." Sharing your journey are some true Edinburgh 'local heroes' - George Drummond, six times elected as Lord Provost who was the driving inspiration behind the planned New Town, Sir James Young Simpson who discovered the anaesthetic properties of chloroform in his house in Queen Street, Sir Walter Scott who penned many of his famous 'Waverley

Novels;' in the study of his home in Castle Street and Sir John Sinclair who masterminded the production of 'The Statistical Account of Scotland' , a unique survey of the Scotland of the 1790s, from his home in Charlotte Square. You will also meet some colourful eccentrics including the self-styled Sobieski brothers who claimed to be the grand-sons of Bonnie Prince Charlie and Hugo Arnot, the asthmatic lawyer, whose 'History of Edinburgh',

published in 1779, gives us an invaluable account of the dramatic changes taking place in the city in the second half of the 18th century. From its early days, the New Town attracted famous visitors including Charles Dickens, Queen Victoria, Vincent Lunardi, the balloonist and George IV who made what was arguably the first modern royal visit, planned by Sir Walter Scott, in August 1822. 'A Walk Through Edinburgh's New Town' draws from several

contemporary sources in describing such events as the visit of George IV, the financial troubles of Sir Walter Scott and the creation of the Earthen Mound. The book is generously illustrated with pictures of the New Town as we can enjoy it today as well as contemporary prints and drawings. The book concludes with a bibliography and some suggestions for further reading. If you enjoy this book then why not continue your journey by

Lemon-Aid Used Cars and Trucks 2011–2012 Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-

Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned

communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
