This fourth title in the series 'The key debates' sets out where the term "techn " comes from, how it released a revolution in thought and how the concept in the midst of the current digital revolution, once again, is influencing the study of film. In addition, the authors investigate how technologies have affected the major debates about film, how they affected film theory and some of its key concepts. This is one of the first books to assess the comprehensive history of the philosophies of technology and their impact on film and media theory in greater detail.

Edinburgh's historic New Town is one of the finest surviving examples of Georgian town planning.Even before work on the first phase of the New Town was completed, visitors were recording their very favourable impressions. An English tourist, Robert Heron, writing at the end of the 1790s, wrote that:"With regard to the buildings that have of late arisen in this City (Edinburgh) with such incredible rapidity, we may venture to say, that, in regularity and magnificence, they are scarcely equalled, or at least not excelled, by any in Europe...When Charlotte Square, at the west end of George Street, shall be completed, this City will certainly surpass, in regularity and magnificence, every other in Great Britain."Edinburgh's New Town was created thanks to the determination and vision of a group of leading citizens led by Lord Provost George Drummond. Having obtained the permission of Parliament to extend the city's royalty to the open fields beyond the Nor' Loch, (now Princes Street Gardens.) The City, very commendably, decided to organise a competition to design what even then was called The New Town. This competition was won in 1766 by a young 23 year old architect James Craig. His plan was a simple but very effective grid-iron design with three parallel streets running from east to west with a grand square at either end of the principal street which was to be named George Street after the King, George III. The foundation of the first house, which still stands, in Thistle Court, was laid in November 1767. Progress westwards though was slow. It was not until 1792 that work started on the houses of Charlotte Square at the west end of George Street. Although commercial development has spoiled much of Princes Street, the majority of Edinburgh's first New Town has survived the passage of time. It remains as one of the finest surviving examples of Georgian Town Planning and as such was recognised, along with the neighbouring Old Town, as a UNESCO World Heritage Site in 1995.'A Walk Through Edinburgh's New Town' is intended both as a guide book for our many visitors and as an informative reference book for those, perhaps living far away as expatriate Scots, who have an interest in Edinburgh's unique story. Sharing your journey are some true Edinburgh 'local heroes' - George Drummond, six times elected as Lord Provost who was the driving inspiration behind the planned New Town, Sir James Young Simpson who discovered the anaesthetic properties of chloroform in his house in Queen Street, Sir Walter Scott who penned many of his famous 'Waverley Novels;' in the study of his home in Castle Street and Sir John Sinclair who masterminded the production of 'The Statistical Account of Scotland' , a unique survey of the Scotland of the 1790s, from his home in Charlotte Square.Your will also meet some colourful eccentrics including the self-styled Sobieski brothers who claimed to be the grand-sons of Bonnie Prince Charlie and Hugo Arnot, the asthmatic lawyer, whose 'History of Edinburgh', published in 1779, gives us an invaluable account of the dramatic changes taking place in the city in the second half of the 18th century.From its early days, the New Town attracted famous visitors including Charles Dickens, Queen Victoria, Vincent Lunardi, the balloonist and George IV who made what was arguably the first modern royal visit, planned by Sir Walter Scott, in August 1822. 'A Walk Through Edinburgh's New Town' draws from several contemporary sources in describing such events as the visit of George IV, the financial troubles of Sir Walter Scott and the creation of the Earthen Mound. The book is generously illustrated with pictures of the New Town as we can enjoy it today as well as contemporary prints and drawings. The book concludes with a bibliography and some suggestions for further reading. If you enjoy this book then why not continue your journey by purchasing the companion title 'A Walk Down Edinburgh's Royal Mile.'

"With the nuance of a reporter and the pace of a thriller writer, Andy Greenberg gives us a glimpse of the cyberwars of the future while at the same time placing his story in the long arc of Russian and Ukrainian history." —Anne Applebaum, bestselling author of Twilight of Democracy The true story of the most devastating act of cyberwarfare in history and the desperate hunt to identify and track the elite Russian agents behind it: "[A] chilling account of a Kremlin-led cyberattack, a new front in global conflict" (Financial Times). In 2014, the world witnessed the start of a mysterious series of cyberattacks. Targeting American utility companies, NATO, and electric grids in Eastern Europe, the strikes grew ever more brazen. They culminated in the summer of 2017, when the malware known as NotPetya was unleashed, penetrating, disrupting, and paralyzing some of the world's largest businesses—from drug manufacturers to software developers to shipping companies. At the attack's epicenter in Ukraine, ATMs froze. The railway and postal systems shut down. Hospitals went dark. NotPetya spread around the world, inflicting an unprecedented ten billion dollars in damage—the largest, most destructive cyberattack the world had ever seen. The hackers behind these attacks are quickly gaining a reputation as the most dangerous team of cyberwarriors in history: a group known as Sandworm. Working in the service of Russia's military intelligence agency, they represent a persistent, highly skilled force, one whose talents are matched by their willingness to launch broad, unrestrained attacks on the most critical infrastructure of their adversaries. They target government and private sector, military and civilians alike. A chilling, globe-spanning detective story, Sandworm considers the danger this force poses to our national security and stability. As the Kremlin's role in foreign government manipulation comes into greater focus, Sandworm exposes the realities not just of Russia's global digital offensive, but of an era where warfare ceases to be waged on the battlefield. It reveals how the lines between digital and physical conflict, between wartime and peacetime, have begun to blur—with world-shaking implications.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers,

shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
