A man of inventiveness, versatility and reformist ideas, Marshal Sebastien Le Preste de Vauban built a formidable ring of fortresses to protect France's national frontiers. More than just a fortification designer, Vauban was also a gifted economist, author, and political strategist. This book tells the complete story of Vauban's exceptional career, placing him within the framework of Louis XIV's reign and revealing his lasting influences in France and other nations. With the aid of numerous detailed drawings, 17th century bastioned fortification, artillery, and siege warfare are described in detail. Vauban's fortifications that are still standing today are particularly highlighted.

The Alcoholism and Addiction Cure contains the powerful three-step program to total recovery that is the basis of the miraculous success of the Passages Addiction Cure Center in Malibu, California. You'll

learn the three steps to permanent sobriety; the four causes of dependency; how your thoughts, emotions, and beliefs are key factors in your recovery; and how to create your own personalized treatment program with the help of health professionals where you live-one that gets to the real, underlying causes of dependency. "Freedom from dependency starts with understanding that alcohol, drugs, and addictive behaviors are not the real problems," say Pax and Chris Prentiss, cofounders of Passages. "Alcohol, street drugs, nicotine, prescription medications, food bingeing, gambling, and the like are merely the substances or behaviors you or your loved ones are using to cope with the real problems-anything from deep emotional pain, ill health, or depression to hypoglycemia, a sluggish thyroid, or brain-wave pattern imbalances. Once the underlying problems are discovered and cured, the need for drugs, alcohol, or addictive behavior will disappear-along with the craving." Chris Prentiss should know. His son Pax was addicted to heroin, cocaine, and alcohol for ten years. They sought help everywhere, but Pax relapsed again and again. In desperation, they finally created their own holistic, hand-tailored program that was a complete break from all other programs and that combined several effective therapies. It saved Pax's life. Together, father and son founded Passages to help others find their own freedom. For decades, we've been hearing that alcoholism and addiction are incurable diseases, but The Alcoholism and Addiction Cure proves that this is a dangerous myth and that the label of "alcoholic" or "addict" destroys the promise of full recovery. Visionaries and innovators, Pax and Chris Prentiss bring new hope to people everywhere who are dependent on drugs, alcohol, or addictive behaviors. This groundbreaking approach will show you how to end relapse, end addictive behavior, and end your suffering.

?This book is a collection of papers presented at the "Archimedes in the 21st Century" world conference, held at the Courant Institute of Mathematical Sciences in 2013. This conference focused on the enduring and continuing influence of Archimedes in our modern world, celebrating his centuries of influence on mathematics, science, and engineering. Archimedes planted the seeds for a myriad of seminal ideas that would grow over the ages. Each chapter surveys the growth of one or more of these seeds, and the fruit that they continue to bear to this day. The conference speakers contributing to this book are actively involved in STEM fields whose origins trace back to Archimedes, many of whom have conducted and published research that extends Archimedes' work into the 21st century. The speakers are not historians, so while historical context is provided, this book is uniquely focused on the works themselves as opposed to their history. The breadth and depth of Archimedes' influence will inspire, delight, and even surprise readers from a variety of fields and interests including historians, mathematicians, scientists, and engineers. Only a modest background in math is required to read this book, making it accessible to curious readers of all ages.

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

First published by the Combat Studies Institute Press. The resulting anthology begins with a general overview of urban operations from ancient times to the midpoint of the twentieth century. It then details ten specific case studies of U.S., German, and Japanese operations in cities during World War II and ends with more recent Russian attempts to subdue Chechen fighters in Grozny and the Serbian siege of Sarajevo. Operations range across the spectrum from combat to humanitarian and disaster relief. Each chapter contains a narrative account of a designated operation, identifying and analyzing the lessons that remain relevant today.

Listen, Little Man! is a great physician's quiet talk to each one of us, the average human being, the Little Man. Written in 1946 in answer to the gossip and defamation that plagued his remarkable career, it tells how Reich watched, at first naively, then with amazement, and finally with horror, at what the Little Man does to himself; how he suffers and rebels; how he esteems his enemies and murders his friends; how, wherever

he gains power as a "representative of the people," he misuses this power and makes it crueler than the power it has supplanted. Reich has us to look honestly at ourselves and to assume responsibility for our lives and for the great untapped potential that lies in the depth of human nature.

A soup-to-nuts introduction to small, economical sailing craft Trailer sailers--the smallest, most economical sailboats with sleeping accommodations--are a popular platform for learning the basics of sailing and are often considered to be the entry level to cruising under sail. Author Brian Gilbert shows how trailer sailers can be the ideal craft for a lifetime of enjoyment, including serious, long-distance cruising. This book covers all the bases, including how to inspect, buy, and equip a boat; how to trailer, sail, navigate, and cruise in small boats; how to use communications and navigation equipment; and more.

Strategic Marketing London : Blackie and son

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

In this “richly imagined” dystopian vision, mankind must find a way to survive as modern civilization slowly comes apart (O, The Oprah Magazine). When Earth ran dry of oil, the age of the automobile came to an end; electricity flickered out. With deprivation came desperation—and desperation drove humanity backward to a state of existence few could have imagined. In the tiny hamlet of Union Grove, New York, every day is a struggle. For Mayor Robert Earle, it is a battle to keep the citizens united. As the bonds of civilization are torn apart by war, famine, and violence, there are some who aim to carve out a new society: one in which might makes right—a world of tyranny, subjugation, and death. A world Earle must fight against . . . In his shocking nonfiction work, *The Long Emergency*, social commentator James Howard Kunstler explored the reality of what would happen if the engines stopped running. In *World Made by Hand*, he offers a stark glimpse of that future in a work of speculative fiction that stands as “an impassioned and invigorating tale whose ultimate message is one of hope, not despair” (San Francisco Chronicle). “Brilliant.” —Alan Cheuse, *Chicago Tribune* “It frightens without being ridiculously nightmarish, it cautions without being too judgmental, and it offers glimmers of hope we don’t have to read between the lines to comprehend.” —*Baltimore City Paper*
