[Neon Tetra Care: The Complete Guide to Caring for and Keeping Neon Tetra as Pet Fish](#) The Neon Tetra (scientifically known as *Paracheirodon innesi*) is a freshwater fish that is a member of the Charachin family. The Neon Tetra is native to southeastern Colombia,

eastern Puru and Western Brazil. It can be commonly found in both black water and clear water streams. The Neon Tetra has a bright coloring which makes it highly visible. The fish has a light-blue back and a sheer silvery abdomen. It also has an iridescent blue horizontal stripe that runs along each side of the fish's front half and an iridescent red stripe that runs along the fish's rear half. Its bright coloring is also the main reason that the Neon Tetra is so popular among tropical fish keepers and collectors. Here at Fish Care Manuals we are passionate about fish care. As a brand we have a strong idea of what makes up a good fish care book. We have consulted with multiple experts in the field of fish caring to allow us to create a book filled with cumulative opinions and best practices. The experts we consult range from veterinarians to every day fish keepers who have had years of experience caring for the specific fish each book is on. Our aim, and mission, is to produce the best possible fish care books that are a great value for money. Over 1,000 total pages .... INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.
