"Never forget, my dear child, that life is made of days, and no matter how many days you were gifted with, you should strive to enjoy every single one of them. When you have given your love and attention to your family and friends, it will still be overflowing, so pay attention to the ideals you care about, to the people whose needs call out to you, to the human race, to the universe itself. Energy spent in activities that don't touch your soul is wasted, and those activities will drag along for a while, only to be abandoned when the first justification presents itself. When you put your heart into something you love however, not a single obstacle can ever stand against it. It may not always be easy, but you can't let go of it, because it is a part of who you are, your purpose." Letters to Lelia - Chapter Twenty Four: Love. Always.

“The end of the world started quietly enough for Tane Williams and Rebecca Richards. . . .” Tane and Rebecca aren’t sure what to make of it—a sequence of 1s and 0s, the message looks like nothing more than a random collection of alternating digits. Working to decode it, however, they discover that the message contains lottery numbers . . . lottery numbers that win the next random draw! More messages follow, and slowly it becomes clear—the messages are being sent from Tane and Rebecca’s future. Something there has gone horribly wrong, and it’s up to them to prevent it from happening. The very survival of the human race may be at stake! “[A] terrifying SF page-turner!”—Booklist “A tautly constructed plot. Fast-paced and all-too-realistic. This technothriller offers gearhead ecowarriors everything, including a hugely satisfying ending.”—Kirkus Reviews A Top 10 Kid’s Indie Next Winter Pick A Junior Library Guild Selection

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master 's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London 's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men’s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ‘tradition’ that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men’s vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

This is an updated and newly revised edition of the classic book The Art of Photography: An Approach to Personal Expression. Originally published in 1994 and first revised in 2010, The Art of Photography has sold well over 100,000 copies and has firmly established itself as the most readable, understandable, and complete textbook on photography. Featuring nearly 200 beautiful photographs in both black-and-white and color, as well as numerous charts, graphs, and tables, this book presents the world of photography to beginner, intermediate, and advanced photographers who seek to make a personal statement through the medium of photography. Without talking down to anyone or talking over anyone's head, renowned photographer, teacher, and author Bruce Barnbaum presents how-to techniques for both traditional and digital approaches. In this newest edition of the book, Barnbaum has included many new images and has completely revised the text, with particular focus on two crucial chapters covering digital photography: he revised a chapter covering the digital zone system, and includes a brand-new chapter on image adjustments using digital tools. There is also a new chapter discussing the concepts of “art versus technique” and “traditional versus digital” approaches to photography. Throughout the book, Barnbaum goes well beyond the technical, as he delves deeply into the philosophical, expressive, and creative aspects of photography so often avoided in other books. Barnbaum is recognized as one of the world's finest landscape and architectural photographers, and for decades has been considered one of the best instructors in the field of photography. This latest incarnation of his textbook—which has evolved, grown, and been refined over the past 45 years—will prove to be an ongoing, invaluable photographic reference for years to come. It is truly the resource of choice for the thinking photographer. Topics include: • Elements of Composition • Visualization • Light and Color • Filters • Black-and-White • The Digital Zone System • The Zone System for Film • Printing and Presentation • Exploding Photographic Myths • Artistic Integrity • Realism, Abstraction, and Art • Creativity and Intuition • A Personal Philosophy • And much, much more...

As John Casti wrote, "Finally, a book that really does explain consciousness." This groundbreaking work by Denmark's leading science writer draws on psychology, evolutionary biology, information theory, and other disciplines to argue its revolutionary point: that consciousness represents only an infinitesimal fraction of our ability to process information. Although we are unaware of it, our brains sift through and discard billions of pieces of data in order to allow us to understand the world around us. In fact, most of what we call thought is actually the unconscious discarding of information. What our consciousness rejects constitutes the most valuable part of ourselves, the "Me" that the "I" draws on for most of our actions--fluent speech, riding a bicycle, anything involving expertise. No wonder that, in this age of information, so many of us feel empty and dissatisfied. As engaging as it is insightful, this important book encourages us to rely more on what our instincts and our senses tell us so that we can better appreciate the richness of human life.
