**A Manual of Engineering Drawing for Students & Draftsmen ...**

This latest edition of A Manual of Engineering Drawing has

been revised to include

changes resulting from the introduction of BS 8888.

British Standard 308 was introduced in 1927 and

acknowledged by

Draughtsmen as THE

reference Standard for

Engineering Drawing.

This book, or manual, is an essential guide for

producing engineering

drawings and annotated

3D Computer-aided

Design (CAD) models to

the latest BSI, ISO and

ASME standards.

Originally published in

1995, this is the fourth

edition of the book, with

the period between

editions reducing each

time, reflecting the rapidly

changing engineering

technology and associated

standards on which the

content is based.

A 1929 edition of "A

Manual of Engineering

Drawing for Students and

Draftsmen" by Thomas

E. French is relatively rare.

The popularity of this book

is suggested by the many

later editions that were

printed. This is a fourth

edition which has been

revised and enlarged.

This copy is a sixth

impression published by

McGraw-Hill Book

Company.
