Free energy devices have been around for a very long time now. I have stood beside a water mill and its power is scary as it could crush you in moments and never even notice. That mill is on a quietly flowing

small river and it can operate at any time day or night without anyone having to pay anything for the power which it uses.

A Practical Guide to 'Free-Energy' Devices
"Free-Energy Devices" or "Zero-Point Energy Devices" are the names applied to systems which appear to produce a higher output power than their input power. There is a strong

tendency for people to state that such a system is not possible since it contravenes the Law of Conservation of Energy. It doesn't. If it did, and any such
