The controversial issues of director liability
and auditor independence are addressed
with pragmatic solutions in this helpful
guide to running a business. Vital strategies
aimed at aligning the interests of
shareholders, directors, and managers in the
best interest of the company are included
with tips for optimizing business earnings
and cash flow to increase shareholder
value. Nine universal governance principles
drawn together from international codes of
conduct such as the King II Code, the GRI
sustainable reporting recommendations,

and the Myburgh report demonstrate how to
optimize shareholder value without
compromising positive corporate and
governance practice.

People use lots of water for drinking,
cooking and washing, but significantly
more for producing things such as food,
paper and cotton clothes. The water
footprint is an indicator of water use that
looks at both direct and indirect water use
of a consumer or producer. Indirect use
refers to the 'virtual water' embedded in
tradable goods and commodities, such as
cereals, sugar or cotton. The water
footprint of an individual, community or
business is defined as the total volume of
freshwater that is used to produce the

goods and services consumed by the individual or community or produced by the business. This book offers a complete and up-to-date overview of the global standard on water footprint assessment as developed by the Water Footprint Network. More specifically it:

- o Provides a comprehensive set of methods for water footprint assessment
- o Shows how water footprints can be calculated for individual processes and products, as well as for consumers, nations and businesses
- o Contains detailed worked examples of how to calculate green, blue and grey water footprints
- o Describes how to assess the sustainability of the aggregated water footprint within a river basin or the water footprint of a specific product
- o Includes an extensive library of possible measures that can contribute to water footprint reduction

 Law and Society in the South reconstructs eight pivotal legal disputes heard in North Carolina

courts between the 1830s and the 1970s and examines some of the most controversial issues of southern history, including white supremacy and race relations, the teaching of evolution in public schools, and Prohibition. Finally, the book explores the various ways in which law and society interacted in the South during the civil rights era. The voices of racial minorities—some urging integration, others opposing it—grew more audible within the legal system during this time. *Law and Society in the South* divulges the true nature of the courts: as the unpredictable venues of intense battles between southerners as they endured dramatic changes in their governing values.

 The Water Footprint Assessment Manual
 Here, John McGreevy chronicles the history of Catholic parishes and connects their unique place in the urban landscape to the course of American race relations in the 20th century. In vivid portraits of parish life in Boston, Chicago, New York and other cities, the author examines the contracts and conflicts between Euro-American Catholics and their African American neighbors, illuminating the enormous impact of religious culture on modern American history.

"John La Farge and the Recovery of the Sacred" accompanies an exhibition of the same name that will open at the McMullen Museum of Art at Boston College in September 2015. This exhibition examines for the first time from an interdisciplinary perspective La Farge's lifelong efforts to visualize the sacred. Most outstandingly shown in his stained glass and ecclesiastical paintings, the exhibition demonstrates how this quest is manifest equally in the artist's representations of nature

and still life and in his stunningly imaginative book illustrations. The exhibition will also explore how his trip to Japan and the South Seas in 1886 reinforced the multicultural range of La Farge's spiritual inquiry. Negotiating the boundaries between realism and symbolism, La Farge is always innovative and intriguing. Scholars and curators Jeffery Howe, David Cave, Cecelia Levin, James O Toole, David Quigley, Virginia Raguin, and Roberto Rosause the stained glass and paintings in the exhibition to inform their original research on this seminal American artist."

Moody's International Manual

In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned

nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.

The Publishers Weekly

The plan consists of a multiple-purpose lake for flood control, fish and wildlife production, and recreation. The dam-site would be located on the Kickapoo River about 1 mile north of La Farge, in Vernon County, southwestern Wisconsin. The dam would be an earth-fill structure with an overall length of 3,960 feet and a maximum height of 103 feet. The conservation or recreation pool at elevation 840 is designed to impound 33,000 acre-feet of water with a surface area of about 1,780 acres extending about 12 miles upstream. Local flood

protection measures for the downstream communities of Gays Mills and Soldiers Grove have been approved; however these are separate projects which will be treated in separate environmental impact statements.

Materials and Construction Practices for Concrete Pavement

The Materials Book

The first comprehensive handbook on the seeds of trees and shrubs produced by the USDA Forest Service was USDA Misc. Pub. 654, Woody-Plant Seed Manual. The manuscript was ready for publication in 1941, but World War II delayed publication until 1948. The boom in tree planting in the 1950s and 1960s created a large demand for seeds and exposed the gaps in our knowledge concerning production and quality of seeds of woody plants in general. The 1974 Handbook proved to be very popular both in this country and

abroad, leading to five printings and translations in several other languages. More than a quarter-century after its publication, however, numerous advances in tree seed technology have dictated that a new revision is needed; the result is the current volume. Part I contains information on how to get seeds and raise seedlings. Get Your Copy Now.

France's greatest architect stands at the center of this unique novel about the reconstruction of Paris during the nineteenth century.

Eye emergency manual

The Book of Five Rings is a text on kenjutsu and the martial arts in general, written by the Japanese swordsman Miyamoto Musashi around 1643. Written over three centuries ago by a Samurai warrior, the book has been hailed as a limitless source of psychological insight for businessmen-or anyone who relies on strategy and tactics for outwitting the competition.
