Technology & Labor Springer

It all started in the 1970s when my own children were on the threshold of adulthood.

The Roving Roo adventures were created around 1989 after a trip to the USA, where my daughter introduced me to a mascot named Kirby Kangaroo. Swaggy Joe became the romantic character of my childhood—when itinerant workers still walked the roads. I have fond memories of some of them, notably an old timer of Bacchus Marsh, Victoria, named Brian Rice, who my Grandma Lyle employed in exchange for food and rudimentary accommodation in the back shed. Another

was a chap named Ruben Webb, who my dad gave work to at our home. He worked well and then wandered his way. Great icons of honesty, integrity, and the freedom to live as they would were both of these men and others of their ilk. I recognize that the normal way of life for me as a child has slipped by as prosperity and technology altered what my grandchildren know as their way of life. I felt that it could assist the new generations if they could be given some insights into life as it once was before their time, albeit in romantic tales of the imagination. For me to express this, I found the lyric ballad came naturally to be the utility of sharing. Although untrained as a writer and communicator, the urge to share a little of “ what was ” or “ maybe was ” prompted this little booklet. I hope that the

readers, those young and those not so, enjoy the unique sharing reading provides.

This book covers the whole of Geometrid moths fauna of mainland Spain and Portugal including the Balearic Islands (Mallorca, Menorca and Ibiza). It is a big step forward and a fine supplement to The Geometrid Moths of Europe, both for those with a special interest in Iberian Geometridae as for those with a more general interest in European species. The text is fully bilingual Spanish-English.

This book compiles research from leading experts in the social, behavioral, and cultural dimensions of sustainability, as

well as local and global understandings of the concept, and on lived practices around the world. It contains studies focusing on ways of living, acting, and thinking which claim to favor the local and global ecological systems of which we are a part, and on which we depend for survival. The concept of sustainability as a product of concern about global environmental degradation, rising social inequalities, and dispossession is presented as a key concept. The contributors explore the opportunities to engage with questions of sustainability and to redefine the concept of sustainability in anthropological terms.

Language resources and computational models are becoming increasingly important for the study of language variation. A main challenge of this interdisciplinary field is that linguistics researchers may not be familiar with these helpful computational tools and many NLP researchers are often not familiar with language variation phenomena. This essential reference introduces researchers to the necessary computational models for processing similar languages, varieties, and dialects. In this book, leading experts tackle the inherent challenges of the field by balancing a thorough discussion of the theoretical background with a meaningful overview of state-of-the-art language

technology. The book can be used in a graduate course, or as a supplementary text for courses on language variation, dialectology, and sociolinguistics or on computational linguistics and NLP. Part 1 covers the linguistic fundamentals of the field such as the question of status and language variation. Part 2 discusses data collection and pre-processing methods. Finally, Part 3 presents NLP applications such as speech processing, machine translation, and language-specific issues in Arabic and Chinese.

As the world around it marches forward, the bucolic English village of Notwithstanding remains unchanged. It is, as it always has been, a place of pubs and cricket pitches, where local

eccentrics—a retired colonel who has eschewed clothes, a spiritualist living with the ghost of her husband, and a dog named Archibald Scott-Moncrieff—almost fit in. In this delightfully evocative collection of stories, in which a young couple falls in and out of love by letter alone, an eleven-year-old boy battles a monstrous fish, and a man of the cloth has a premonition of death, Louis de Bernières conjures up a rural idyll long since forgotten. Funny, bittersweet, and deeply felt, *Notwithstanding* is the bestselling author of *Corelli's Mandolin* at his most enchanting.

Dynamic Positioning Systems CarTech Inc Pain Management for Veterinary Technicians and Nurses guides readers through the important concepts of animal pain management, providing specific approaches to managing pain in a wide variety of veterinary conditions. Emphasizing the technician's role in advocating for the patient, the book equips technicians with the knowledge needed to manage pain in dogs, cats, horses, livestock, exotics, and zoo animals. Logically and comprehensively covering this difficult subject, Pain Management for Veterinary Technicians and Nurses provides both introductory material on the tenets of pain management and specific techniques to apply in the clinical setting. With information on recognizing and understanding pain, the physiology

of pain, pharmacology, and analgesia in different settings, the book outlines how to practice good pain management as an integral part of nursing care. Pain Management for Veterinary Technicians and Nurses provides both basic and advanced information, allowing students, practicing veterinary technicians and nurses, and veterinary staff alike to take a more active role in pain management and develop a more thorough understanding of this complex subject.

Lord Rutherford has said that all science is either physics or stamp collecting. On that basis the study of forest biomass must be classified with stamp collecting and other such pleasurable pursuits. Japanese scientists have led the world, not only in collecting basic data, but in their attempts to

systematise our knowledge of forest biomass. They have studied factors affecting dry matter production of forest trees in an attempt to approach underlying physical principles. This edition of Professor Satoo's book has been made possible the help of Dr John F. Hosner and the Virginia Poly technical Institute and State University who invited Dr Satoo to Blacksburg for three months in 1973 at about the time when he was in the final stages of preparing the Japanese version. Since then the explosion of world literature on forest biomass has continued to be fired by increasing shortages of timber supplies in many parts of the world as well as by a need to explore renewable sources of energy. In revising the original text I have attempted to maintain the input of Japanese work - much of which is not widely available outside Japan - and to update both the basic information and, where necessary, the conclusions to keep them in tune with current thinking. Those familiar with the Japanese original will find Chapter 3 largely rewritten on the basis of new work - much of which was initiated while Dr Satoo was in Blacksburg.
