A young Chinese came to the U.S. for theological training. His goal was to become a pastor/teacher in Singapore.

Upon graduation, he returned to Singapore with his Caucasian wife to fulfill his obligations and to do post-graduate study, concurrently.

Unwittingly, the young couple was entangled in church and secular politics and they had to leave Singapore. They began a new life in America. At several critical junctures of the protagonist's career when he was in a relatively

comfortable environment, he moved out of the comfort zone to tackle a new challenge, in response to a higher calling. The detours in his life journey, the prejudice and discrimination in the workplace, the consistent acts of fairness of people of good will, the secrets of his success, and the mellowing of his worldview and religious faith are the substance of this unusual book of inspiration. For a deeper appreciation of one who has led a life full of challenges, a life characterized by many successes against high odds and a life replete with recognitions and awards in secular and religious settings, I invite you to read on.

100 revisions Ten years later, they're still talking about the weather! Kate Fox, the social anthropologist who put the quirks and hidden conditions of the English under a microscope, is back with more biting insights about the nature of Englishness. This updated and revised edition of *Watching the English* - which over the last decade has become the unofficial guidebook to the English national character - features new and fresh insights on the unwritten rules and foibles of "squaddies," bikers, horse-riders, and more. Fox revisits a strange and fascinating culture, governed by complex sets of unspoken rules and bizarre codes of behavior. She demystifies the peculiar cultural rules

that baffle us: the rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid pantomime rule. Class anxiety tests. The roots of English self-mockery and many more. An international bestseller, *Watching the English* is a biting, affectionate, insightful and often hilarious look at the English and their society.

*In Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to

dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. *Refuting Thomas Piketty*, Paul

Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe.

Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

5 Injuries are a leading cause of death and disability in children. This report presents evidence on how they can be prevented and calls for greater commitment and action from

---

policy-makers and practitioners to decrease the burden. Every year, unintentional injuries kill nearly 42,000 children and young people under the age of 20 in the WHO European Region. Injuries are the leading cause of death among those aged 5-19 years, and 5 out of 6 of these deaths occur in low- and middle-income countries.

Irrespective of country income, the burden falls disproportionately on children from the most disadvantaged groups. The leading types of unintentional injuries are road traffic injuries, drowning, poisoning, burns and falls. All injury types have similar main causes and

socioeconomic and environmental determinants. Children are particularly vulnerable to injuries and need special consideration to safeguard their rights to health and safe environments, free from injury. This report, companion to the World Report on Child Injury Prevention, presents the evidence on both the great potential for injury prevention and the effectiveness and value for money of measures already in use in European countries with low injury mortality. It shows why health systems and particularly programs for child health throughout the WHO European Region should give priority to preventing and

---

controlling child injury.
