Structural Integrity Assessment Haynes Publishing UK Perhaps the most iconic steam locomotive in the world, the

legendary Flying Scotsman was the first train to achieve 100mph and in its glory days ran the only non-stop passenger service between London and Edinburgh. When it was withdrawn from regular service in 1963, after nearly 40 years in service, the locomotive had travelled an estimated two million miles. In January 2016, after a complete and expert restoration project lasting a decade, Flying Scotsman returned to the UK's mainline as one of the jewels in the National

Railway Museum's vehicle's collection.

Techno and New Age as Transnational Countercultures in Ibiza and Goa

Haynes Icons Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia.

Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical

paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal

regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for

undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

O marketing de guerrilha é, atualmente, a forma de divulgação mais adequada a este mundo que mudou da economia de produção em massa para a de produtos customizados, dirigidos para nichos específicos, onde quem fala para todos não fala

com ninguém. Chico Cavalcante apresenta as vantagens do marketing de guerrilha, seus conceitos norteadores e também como planejar uma ação que traga resultados melhores e a um custo bem menor do que uma campanha tradicional, sempre tendo como foco uma divulgação que levará a uma venda, à consolidação da marca e à criação de fluxos de informação.

This book includes the papers presented at the fifth International Conference on Application of Natural Language to Information Systems (NLDB 2000) which was held in Versailles (France) on June 28-30. Following

NLDB95 in
Versailles, NLDB96
in Amsterdam,
NLDB97 in
Vancouver, and
NLDB99 in
Klagenfurt, NLDB
2000 was a forum
for exchanging new
research results
and trends on the
benefits of
integrating Natural
Language
resources in
Information System
Engineering. Since
the first NLDB
workshop in 1995 it
has become
apparent that each
aspect of an
information system
life cycle may be
improved by natural
language
techniques:
database design
(specification,
validation, conflict
resolution),
database query
languages, and

application
programming that
use new software
engineering
research (natural
language program
specifications). As
information systems
are now evolving
into the
communication
area, the term
databases should
be considered in the
broader sense of
information and
communication
systems. The main
new trend in NLDB
2000 is related to
the WEB wave:
WEB querying,
WEB answering,
and information
retrieval. Among 47
papers submitted
from 18 countries,
the program
committee selected
29 papers to be
presented during
the conference.
Besides these

regular papers, two
invited talks (given
by Pr. Reind P. van
de Riet and Pr.
Maurice Gross),
and a set of posters
and demonstrations
are also included in
these proceedings.
