Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times.

Joseph Dixon, a seasoned traveler, is drawn to the ethereal ruggedness of the Himalayas. But it's the turn of the millennium and the Maoist People's War has been quietly tearing Nepal apart. As a volunteer, Joseph settles into the Myagdi district of Nepal, a good two days walk to anywhere he would consider civilization. In the tiny village of Rinrut he meets young Kunjana, a wartime orphan whose parents have been killed by Maoists. Once the violence overflows into Myagdi and Kunjana is attacked, Joseph, trying to give this young child a chance at a life in Kathmandu plots her escape. Joseph's noble intentions have consequences far greater than he could have imagined. After trekking the famed but increasingly hostile Annapurna Circuit trek, and upon his return home, Joseph is forced to come to terms with himself

and his connection to the Kingdom in the Clouds.

Author Bio: Leon David Dunn was born and raised in Windsor, Ontario. After studying philosophy at university, he left North America for an 11-year, around-the-world adventure which allowed him to call home places as varied as England, Scotland, Italy, Australia, and Japan. In 2002 he spent six months in India and Nepal. Starting his journey in a volunteer home, he then travelled north to trek the Annapurna Circuit during the height of the Maoist People's War. He currently lives in Vancouver, B.C Canada.

The Office Politics Handbook is for business executives, managers, consultants, lawyers, agents, editors, and anyone who wants to become more politically astute, more powerful, and more successful. This is not a book on political game playing; it is for people who hate power games but who know that politics takes place in every organization and want to make sure they wind up on top of the heap...not at the bottom of the barrel. This book will explain why people are political animals, and why they engage in power-seeking behavior. It will also discuss different instruments of power to help you understand the cultural and collective forces at work in human nature, and the occasionally aggressive characteristics of the political animal. The Office Politics Handbook will show you how to: Cultivate your political skill Exercise power beyond your place in the organizational chart Defend yourself against political attacks Know when to fight, when to retreat, and when to lead

The Flying Lady Little, Brown

Despite current concerns for "family values" and the dissolution of marriages, Amy A. and Leon R. Kass see very little attention being paid to what makes for marital success. They argue there are no longer socially prescribed forms of conduct that help guide young men and women in the direction of matrimony; the very concepts of "wooing" and "courting" seem archaic. Yet they see major discontent with the present situation and detect among their students certain longings--for friendship, for wholeness, for a life that is serious and deep, and for associations that are trustworthy and lasting--longings they do not realize could be largely satisfied by marrying well. Wing to Wing, Oar to Oar: Courting and Marrying is an anthology of source readings offered as a response to the contemporary cultural silence surrounding love that leads to marriage. It addresses important questions that emerge not from theory, but from practice: Why marry? Is this love? How can I find and win the right one to marry? What about sex? Why a wedding and the promises of marriage? What can married life be like? Using readings taken mainly from classic texts of Homer, Herodotus, Plato, Aquinas, Erasmus, Shakespeare, Rousseau, Austen,

Tolstoy, C.S. Lewis, Miss Manners, and many others, this collection challenges our unexamined opinions, expands our sympathies, elevates our gaze. It offers a higher kind of sex education, one that prepares hearts and minds for romance leading to lasting marriage, and introduces us to possibilities open to human beings in everyday life that may be undreamt of in our current philosophizing. This unapologetically pro-marriage anthology is intended to help young people of marriageable age and their parents think about the meaning, purpose, and virtues of marriage and, especially, about finding the right person with whom to make a life.

"The definitive account . . . A fascinating combination of grand strategy and personal vignettes" (Max Boot, *The Wall Street Journal*). Finalist for the 2013 Guggenheim-Lehrman Prize in Military History *Surge* is an insider's view of the most decisive phase of the Iraq War. After exploring the dynamics of the war during its first three years, the book takes the reader on a journey to Fort Leavenworth, Kansas, where the controversial new US Army and Marine Corps counterinsurgency doctrine was developed; to Washington, DC, and the halls of the Pentagon, where the joint chiefs of staff struggled to understand the conflict; to the streets of Baghdad, where soldiers worked to implement the surge and reenergize the flagging war effort before the Iraqi state splintered; and to the halls of Congress, where Amb. Ryan Crocker and Gen. David Petraeus testified in some of the most contentious hearings in recent history. Using newly declassified documents, unpublished manuscripts, interviews, author notes, and published sources, *Surge* explains how President George W. Bush, Prime Minister Nouri al-Maliki, Ambassador Crocker, General Petraeus, and other US and Iraqi political and military leaders shaped the surge from the center of the maelstrom in Baghdad and Washington. "This is one of the best books to emerge from the Iraq War. I expect it will be remembered as one of the most insightful accounts from an insider of the key 'surge' phase of that conflict. The chapter on the Sunni Awakening especially stands out as a terrific overview of that critical development." —Thomas E. Ricks, author of *Fiasco*

Of late the term Iberian Studies has been gaining academic currency, but its semantic scope still fluctuates. For some it is a convenient way of combining the official

cultures of two states, Portugal and Spain; yet for others the term opens up disciplinary space, altering established routines. A relational approach to Iberian Studies shatters the state's epistemological frame and complexifies the field through the emergence of lines of inquiry and bodies of knowledge hitherto written off as irrelevant. This timely volume brings together contributions from leading international scholars who demonstrate the cultural and linguistic complexity of the field by reflecting on the institutional challenges to the practice of Iberian Studies. As such, the book will be required reading for all those working in the field.

Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories - national libraries, large public libraries, small public libraries, university libraries - and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and

analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Conscious blood flow (CBF) is about enhancing our physical, mental, and spiritual wellbeing through the pleasurable and mindful exercising of your body's internal arteries and organs. This is brought about by becoming attuned to your natural abilities to just "be" and by learning to sense your interior body, and then being able to consciously direct and control the flow of your blood. And, one can orgasm many organs, hence the book's title of Organ Orgasms. Despite the catchy (but true) title, this book is about the mystery and joy of experiencing one's existence in a unique way (an aspect of being), and about discovering our bodies and nourishing them so we can experience our lives in the healthiest and longest way possible (an aspect of wellbeing). Thus, Organ Orgasms is really about being and wellbeing. It will enable people (no matter what stage they are at in life) to see more clearly into themselves, and then use the book as a guide in developing their own personal plan for living more joyously and healthily. Organ Orgasms is not formulaic or like other self-help books, but it will help people learn how to take care of themselves better and get them re-thinking about their purpose in life and ensure their wellbeing. The book is written for the lay reader and includes over 150 extremely useful illustrations. Yet, it has also been cleverly crafted to meet the needs of the scholarly reader by the use of endnotes and appendices, which provide a stunning amount of scientific evidence for how the body, brain and mind work to make CBF possible.

Along with plan and elevation, section is one of the essential representational techniques of architectural design; among architects and educators, debates about a project's section are common and often intense. Until now, however, there has been no framework to describe or evaluate it. *Manual of Section* fills this void. Paul Lewis, Marc Tsurumaki, and David J. Lewis have developed seven categories of section, revealed in structures ranging from simple one-story buildings to complex structures featuring stacked forms, fantastical shapes, internal holes, inclines, sheared planes, nested forms, or combinations thereof. To illustrate these categories, the authors construct sixty-three intricately detailed cross-section perspective drawings of built projects—many of the most significant structures in international architecture from the last one hundred years—based on extensive archival research. *Manual of Section* also includes smart and accessible essays on the history and uses of section.
