Lightweight Electric/Hybrid Vehicle Design covers the particular automotive design approach required for hybrid/electrical drive vehicles. There is currently huge investment world-wide in electric vehicle propulsion, driven by concern for pollution control and depleting oil resources. The radically different design demands of these new vehicles requires a completely new approach that is covered comprehensively in this book. The book explores the rather dramatic departures in structural configuration necessary for purpose-designed electric vehicle including weight removal in the mechanical systems. It also provides a comprehensive review of the design process in the electric hybrid drive and energy storage systems. Ideal for automotive engineering students and professionals Lightweight Electric/Hybrid Vehicle Design provides a complete introduction to this important new sector of the industry. Comprehensive coverage of all design aspects of electric/hybrid cars in a single volume Packed with case studies and applications In-depth treatment written in a text book style (rather than a theoretical specialist text style)

Digital Forensics and Cyber Crime Unesco

Dating back several thousand years, the art of lacquer is one of the most ancient expressions of Asian culture, and this publication provides an overview of the different kinds of methods and materials used in Cambodia, China, India, Korea, Japan, Myanmar, Thailand and Vietnam. The number of people employed in this ancestral art has fallen dramatically throughout Asia in recent decades, and this book considers the challenges to its survival as well as highlighting the importance of documenting past and modern procedures.

Despite being a universal experience, eating occurs with remarkable variety across time and place: not only do we not eat the same things, but the related technologies, rituals, and even the timing are in constant flux. This lively and innovative history paints a fresco of the Italian nation by looking at its storied relationship to food.

Patton's Juggernaut: The Rolling 8-Ball 8th Tank Battalion of the 4th Armored Division Herald Books

Ahogy az áruházi lángjai végigsöpörnek a Birodalmon, Hórusz leigáz és elpusztít mindenkit, aki ellene szegül. A Marson a kohóvárosok a galaxist átszel? expedíciós flották számára termelik a hadianyagot, így a Mechanicum papságának szül?bolygója feletti uralom kulcsfontosságúvá válik a közelg? háborúban. A Hadúr ügynökei elhítik a lázadás magvait, s egymás ellen fordítják a korábban h?séges kohókat és a hatalmas titán légiókat. Miközben suttogva terjed a Vörös Bolygó felszíne alatt rejt?zköd? ?si gonosz, a Sötét Mechanicum felemelkedik...

Road & Track Penguin

-The first comprehensive homage to the Porsche R and RS models -From the first 911 R (1967) through the varying RS models, to the latest 911 R (2016) -Includes interviews with enthusiasts, racing drivers and customers -Presents portraits of unique collectors' items and race histories -Celebrates the 50th Anniversary of the Porsche 911 R in 2017 Porsche's sporting elite - the 911 R - more performance, less weight. As the first comprehensive homage to the R and RS models, this is a must-have for all Porsche 911 lovers. At auctions they rack up premium prices, but the makers of the 911 R never intended to create objects of speculation for maximum profit. Their main concern was developing vehicles that would appeal to customers because of their uncompromising sportiness. The story begins 50 years ago, when the first Porsche 911 R achieved five new long-distance world records in Monza; and goes on to the latest 911 R - a car that is aware of its history, with racing stripes, houndstooth bucket seats, manual gear change, and a free-revving naturally aspirated engine. In between the first and the latest lie 50 years,

numerous models, and a legion of fans.

This book contains a selection of thoroughly refereed and revised papers from the Third International ICST Conference on Digital Forensics and Cyber Crime, ICDF2C 2011, held October 26-28 in Dublin, Ireland. The field of digital forensics is becoming increasingly important for law enforcement, network security, and information assurance. It is a multidisciplinary area that encompasses a number of fields, including law, computer science, finance, networking, data mining, and criminal justice. The 24 papers in this volume cover a variety of topics ranging from tactics of cyber crime investigations to digital forensic education, network forensics, and the use of formal methods in digital investigations. There is a large section addressing forensics of mobile digital devices.

This unique book shares the knowledge and experience of experts and scientists who apply high-quality findings and input from their research to issues concerning the management of water resources and their quality in Baltic countries including Poland, Lithuania, Latvia, Germany and Russia. It summarizes the latest results of several systematic investigations, and assesses the occurrence and quality of surface and underground waters within the Baltic countries to help decision-makers plan for sustainable development. The book addresses a range of water resources management issues, especially those that are relevant to the water quality in these Baltic countries. It presents cutting-edge information and findings that can be effectively used to solve a variety of problems in integrated water resources management. Accordingly, it will be of interest to graduate students, researchers, water scientists, professionals, experts and practitioners working in water resources management.

God, My Country and Me Herald Books

"My intention in the creation of the Moulton bicycle was to take the evolution of that most remarkable device a stage beyond its classical form. In other words to produce a bicycle which was more pleasing to have and to use....One of the most pleasing consequences of the Moulton bicycle epic so far has been the spontaneous growth of the Moulton Users' groups: and to meet and to ride with them gives me special pleasure." -- Dr. Alex Moulton *** The purpose of this book is twofold. It introduces the Moulton bicycle to the many people - cyclists and non-cyclists alike - who either know nothing of it or whose knowledge is limited by the virtual disappearance of this extraordinary machine from our roads; by the numerous myths circulating about it and by the cursory mention it receives in most cycling books. Additionally, the book offers to Moulton owners and devotees a further appreciation of the background history and capability of the bike. (Series: Bicycle Science - Vol. 2) [Subject: History, Bicycle Science, Engineering]

How to Rebuild Your Volkswagen Air-Cooled Engine Bloomsbury Publishing

Great Small Fiats is a tribute to some of the best small Fiats ever produced. In deciding which models to include in this book, Phil Ward concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car-buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point, as it fulfils all the criteria, and was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principles continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these "cheeky" Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner through to recent models.
