"Hello, my name is Thomas Thwaites, and I have made a toaster." So begins The Toaster Project, the author's nine-month-long journey from his local appliance store to remote mines in the UK to his mother's backyard, where he creates a crude foundry. Along the way, he learns that an ordinary toaster is made up of 404 separate parts, that the best way to smelt metal at home is by using a method found in a fifteenth-century treatise, and that plastic is almost impossible to make from scratch. In the end, Thwaites's homemade toaster—a haunting and strangely beautiful object—cost 250 times more than the toaster he bought at the store and involved close to two thousand miles of travel to some of Britain's remotest locations. The Toaster Project may seem foolish, even insane. Yet, Thwaites's quixotic tale, told with self-deprecating wit, helps us reflect on the costs and perils of our cheap consumer culture, and in so doing reveals much about the organization of the modern world.

Forty years ago, Buzz Aldrin became the second human - minutes after Neil Armstrong - to set foot on a celestial body other than the Earth. The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history. In the years since, millions more have had their earth-centric perspective changed forever by gazing at the iconic photograph of Aldrin standing on the surface of the Moon with the blackness of space behind him. He described what he saw as 'magnificent desolation'. The flight of Apollo 11 made Aldrin one of the most famous people on the planet, yet few people know the rest of the story. In *Magnificent Desolation*, Aldrin not only gives us a harrowing first-person account of the lunar landing that came within seconds of failure, as well as the ultimate insider's view of life as one of the superstars of America's space program, he also opens up with remarkable candor about his more personal trials - and eventual triumphs - back on Earth. From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the Moon before the decade was out, Aldrin returned home to an Air Force career stripped of purpose or direction, other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour. The twin demons of depression and alcoholism emerged - the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him. As an adventure story, a searing memoir of self-destruction and self-renewal, and as a visionary rallying cry to once again set our course for Mars and beyond, *Magnificent Desolation* is the thoroughly human story of a genuine hero.

The Memory Keeper's Daughter
A #1 New York Times bestseller by Kim Edwards, The Memory Keeper ' s Daughter is a brilliantly crafted novel of parallel lives, familial secrets, and the redemptive power of love Kim Edwards ' s stunning novel begins on a winter night in 1964 in Lexington, Kentucky, when a blizzard forces Dr. David Henry to deliver his own twins. His son, born first, is perfectly healthy, but the doctor immediately recognizes that his daughter has Down syndrome. Rationalizing it as a need to protect Norah, his wife, he makes a split second decision that will alter all of their lives forever. He asks his nurse, Caroline, to take the baby away to an institution and never to reveal the secret. Instead, she disappears into another city to raise the child herself. So begins this beautifully told story that unfolds over a quarter of a century—in which these two families, ignorant of each other, are yet bound by the fateful decision made that winter night long ago. A family drama, The Memory Keeper ' s Daughter explores every mother's silent fear: What would happen if you lost your child and she grew up without you? It is also an astonishing tale of love and how the mysterious ties that hold a family together help us survive the heartache that occurs when long-buried secrets are finally uncovered.

Much literature is available discussing the concept of globalization, but now it is time for some practical advice on what it actually means for an organization. Globalization: The internal dynamic and Globalzation: The External Pressures can be read independently or as a complement to the other. The aim of both books is to present an all-round dissection and a one-stop source of latest thinking on the topic of globalization. The focus is both on issues that arise within the internal workings of an organization and on the pressures that come to bear from outside. Globalization - The Internal Dynamic focuses on what it really takes to become a global organization. Inspite of many organizations' efforts, the reality is that few are truly global, or even transnational. This book considers how a global organization should look, and what the potential barriers are to achieving a true global status. Topics covered in the book include: * Does the global organization really exist? * The high human and personal cost of global leadership roles * Designing your organization for successful globalization * Corporate culture as a barrier to achieving a global presence * Organizational change in global companies * Linking organizational learning to the strategic direction of a global company * The systems and processes behind global e-learning * The importance of teams to globalization * Competencies required by the global manager * The global leader In addition, the authors offer a new model of global organization that allows companies to audit themselves and see how far down the road to globalization they have progressed.
