Tahiti Nui is an account of the survival of a Polynesian society in the face of successive settlements of missionaries, traders, and administrators. Beginning with the first explorers and Captain Cook's scientific observations at Point Venus, Dr. Newbury has separated the various strands interwoven in the fabric of Tahitian society, tracing their development and showing how they interacted at successive stages. Missionaries and foreign traders, administrators and Polynesians, planters and immigrant Chinese have all contributed to the distinctive flavor of French Polynesia, with Tahiti and Tahitians becoming increasingly dominant, not just as the focus of the French administration in Pape'ete, but in the social networks and trading patterns that have evolved.

"Book and man are brilliant, passionate, optimistic and impatient . . . Outstanding." —The Economist The landmark exploration of economic prosperity and how the world can escape from extreme poverty for the world's poorest citizens, from one of the world's most renowned economists Hailed by Time as one of the world's hundred most influential people, Jeffrey D. Sachs is renowned for his work around the globe advising economies in crisis. Now a classic of its genre, *The End of Poverty* distills more than thirty years of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years after its initial publication, *The End of Poverty* remains an indispensable and influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations.

A classic and impassioned account of the Haitian Revolution—the first revolution in the Third World and the model for the liberation movements from Africa to Cuba. "One of the seminal texts about the history of slavery and abolition. . . . Provocative and empowering." —The New York Times Book Review This powerful, intensely dramatic book is the definitive account of the Haitian Revolution of 1794-1803, a revolution that began in the wake of the Bastille. It is the story of the French colony of San Domingo, a place where the brutality of master toward slave was legendary. And it is the story of a barely literate slave named Toussaint L'Ouverture, who led the black people of San Domingo in a successful struggle against successive invasions by overwhelming French, Spanish, and English forces and in the process helped form the first independent nation in the Caribbean.

The best-selling comprehensive history of the world, from the perspective of struggling peoples throughout the ages—now with new material and a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. "I have had many people ask me if there is a book which does for world history what my book *A People's History of the United States* does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman's *A People's History of the World*." —Howard Zinn

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process." —Harper's "One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs." —The Nation "A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance." —Los Angeles Free Press

The groundbreaking debut by the award-winning author of *Wayward Lives, Beautiful Experiments*, revised and updated. Saidiya Hartman has been praised as "one of our most brilliant contemporary thinkers" (Claudia Rankine, *New York Times Book Review*) and "a lodestar for a generation of students and, increasingly, for politically engaged people outside the academy" (Alexis Okeowo, *The New Yorker*). In *Scenes of Subjection*—Hartman's first book, now revised and

expanded—her singular talents and analytical framework turn away from the "terrible spectacle" and toward the forms of routine terror and quotidian violence characteristic of slavery, illuminating the intertwining of injury, subjugation, and selfhood even in abolitionist depictions of enslavement. By attending to the withheld and overlooked at the margins of the historical archive, Hartman radically reshapes our understanding of history, in a work as resonant today as it was on first publication, now for a new generation of readers. This 25th anniversary edition features a new preface by the author, a foreword by Keeanga-Yamahtta Taylor, an afterword by Marisa J. Fuentes and Sarah Haley, notations with Cameron Rowland, and compositions by Torkwase Dyson.

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

Essentials of WRAML2 and TOMAL-2 Assessment introduces professionals to these two widely used memory measurement batteries, both of which measure memory and are used to supplement evaluations of ADHD and reading problems in youngsters, as well as a number of other disorders across the age span. Written by Wayne Adams and Cecil Reynolds, this essential reference provides administration guidelines, including procedural suggestions and solutions for common problems examiners may encounter; expert assessment of each test's relative strengths and weaknesses; valuable advice on clinical applications; and illuminating case reports.
