Mazda B Serie Timing Belt Replace Manual

Replacing a timing belt is a complex job that cannot be done without the use of dedicated tools that can vary from application to application. On our packaging you can find a reference to the required tools you need to install a timing belt correctly. Ask your supplier about the Gates range of professional tools.

When does the timing belt need to be replaced?

Timing belt replacement cost: The timing belt replacement in a 4-cylinder engine costs from \$250 to \$650, plus extra if a water pump or other parts need to be replaced. In a V6 or V8 engine, the price to replace a timing belt ranges from \$450 for just a belt to over \$1,000 if a water pump and related hardware need to be changed.

Which cars have timing chain or belt?

Replacing your timing belt requires a few new pieces of kit: the belt itself, tensioners and pulleys, drive belts, seals, and usually a water pump/coolant. These parts work together closely, and generally wear to one part will equally affect the other. The exact cost of timing belt replacement depends on your car brand and model.

How To Replace The Timing Belt | Shown on DOHC Engine

Your timing belt should be replaced every 50,000 – 70,000 miles, depending on your car's make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

Ford Fiesta routine maintenance guide ... - Haynes Manuals

There is an easy way to find out if your car is driven by a timing chain or timing belt motor. If, on the side (not top) of the engine, either left or right, there is a plastic

cover, your car has timing belt. If there is no plastic on the side, you have a timing chain. Here is a video that explains and shows the point.
