MANUAL TRANSMISSION FLUIDS | PRODUCTS | HOME

Been "Tinkering" with manual transmission fluids for many decades and have concluded the Honda fluid is the best for any manual transmission (no, I haven't tried it in all manufactures transmissions). Seems to provide the best friction for the syncros and and

protects the gears at any temperature.

Do You Really Need to Change the Transmission Fluid ...

Regardless of what your manual transmission uses, the fluid or oil's primary function is lubrication—preventing metal-to-metal contact between the meshing gears. Gear oil is different from engine oil. For starters, gear oil can come in much higher viscosity ratings. In other words, a 80w-90 gear oil is much "thicker" than a 5w-30 engine oil. But viscosity is only part of the equation. Here's why: Manual transmissions are often made up of different metals.

Manual Transmission Fluid Types | It Still Runs

Manual Transmission

Fluid Application Guide. With so many automatic Transmission fluids, it's hard to choose the one best-suited for each vehicle. As the trusted leader in Transmission and drive line fluid applications, Valvoline has the most complete line up of branded solutions. Contact **How to Change Manual Transmission Fluid**

Manual transmissions require more conventional gear oil rather than ATF and tend to be on a different maintenance schedule, so it's best to consult the service intervals in the owner's manual.

Best Transmission Fluid for Cars, Trucks & SUVs
