The automatic transmission is \$1,400, but its improved fuel economy — 15/25/18 mpg city/highway/combined EPA ratings versus 14/23/17 mpg — frees it of the manual model's \$1,000 gas-guzzler tax. An...

Manual vs. Automatic Transmission: Which Is Better For You ...
When you're using a manual transmission, you're the one who is telling the vehicle when to switch gears. You use a clutch and the gas pedals to signal when it's time to shift upward or downward. An automatic transmission does this process for you, usually using a computer to detect when the changes need to be made.

While the driver plays an active role in the operation of a vehicle with a manual transmission, in an automatic transmission the driver simply selects D on the shifter and the car does all hard work. Using fluid pressure, the vehicle automatically completes gear changes on its own. The heart of the automatic transmission is the planetary gear set.

Why does a manual transmission have less torque than an ...
Automatic transmissions require regular fluid changes and have a filter that needs to be replaced. That's because a traditional automatic transmission with a torque converter has slippage and relatively high fluid operating temperature with normal use. This degrades the fluid much more quickly than in a manual transmission.
