Practical applications of physiology of exercise factual materials found in the Applied Physiology of Exercise textbook are of paramount importance to understand the principles of training. The Applied Physiology of Exercise Laboratory Manual complements the Applied Physiology of Exercise textbook where practical applications in both laboratory and field settings are shared. These practical applications are mostly through personal research at the Nanyang Technological University, National Institute of Education, and Human Bioenergetics Laboratory of Singapore. The uniqueness of the laboratory sessions found in the manual was attested to the many hours of hard laboratory research work. For example, the Running Energy Research Index (RERI) Laboratory was born as a result of a 10-year long research. This laboratory research work, like the other researched laboratory sessions in the manual, is then used in practical sessions in physiology of exercise classes to fine-tune the

best possible learning experiences for students. After a long process of fine tuning and constructive feasibility, the laboratory sessions became concrete and designed specifically for this manual.

This “whirling, no-holds-barred,” national bestselling memoir of mixed martial arts by the author of *The Fighter’s Mind* is “adrenaline-addled and addictive” (Playboy). In *A Fighter’s Heart*, former merchant marine and Harvard graduate Sam Sheridan shares a “fascinating” first-person account of his life inside the world of professional MMA fighting “and his behind-the-scenes access makes for a gripping read” (Sara Cardace, *The Washington Post*). In 1999, after a series of adventurous jobs—construction at the South Pole, ranching in Montana, and sailing private yachts around the world—Sheridan found himself in Australia with time to finally indulge a long-dormant obsession: fighting. After training in Bangkok at the legendary Fairtex Gym, Sheridan stepped through the ropes for a professional bout, embarking on an epic journey to discover what only a fighter can know about fear, violence, and most of all, himself. From small-town Iowa to the beaches of Rio, from the streets of Oakland to the arenas of Tokyo, Sheridan trained, traveled, and fought with Olympic boxers, Brazilian jiu-jitsu stars, and Ultimate

Fighting champions. This chronicle offers an insightful look at violence as a spectator sport, as well as a dizzying account of what it’s like to hit—and be hit by—some of the best fighters in the world.
