This practical guide covers all aspects of stage lighting equipment, special effects, lighting a performance space and lighting design. It is well illustrated with examples of equipment, diagrams, plans and technical data. It also features the work of current lighting designers. The associated video content shows the practical use of equipment and different lighting techniques and effects. It provides easy access to the content through the use of tabulated sections and keyword headings. The information in

each chapter is presented at three levels which run visually throughout the guide enabling students to mix and match their own personal level of study or for practitioners to fast track through to the information they need on stage. This new and revised second edition brings the guide right up to date, and includes all new material on the development of LED lighting in recent years, as well as online video resources.

Author David Saunders,
former keeper of conservation
and scientific research at the

British Museum, explores how
to balance the conflicting goals
of visibility and preservation
under a variety of conditions.
Beginning with the science of
how light, color, and vision
function and interact, he
proceeds to offer detailed
studies of the impact of light on
a wide range of objects,
including paintings,
manuscripts, textiles, bone,
leather, and plastics. With
analyses of the effects of light
on visibility and deterioration,
Museum Lighting provides
practical information to assist
curators, conservators, and
other museum professionals in

making critical decisions about the display and preservation of objects in their collections.
