Legendary money manager Peter Lynch explains his own strategies for investing and offers advice for how to pick stocks and mutual funds to assemble a successful investment portfolio. Develop a Winning Investment Strategy—with Expert Advice from “The Nation’s #1 Money Manager.” Peter Lynch’s “invest in what you know” strategy has made him a household name with investors both big and small. An important key to investing, Lynch says, is to remember that stocks are not lottery tickets. There’s a company behind every stock and a reason companies—and their stocks—perform the way they do. In this book, Peter Lynch shows you how you can become an expert in a company and how you can build a profitable investment portfolio, based on your own experience and insights and on straightforward do-it-yourself research. In *Beating the Street*, Lynch for the first time explains how to devise a mutual fund strategy, shows his step-by-step strategies for picking stock, and describes how the individual investor can improve his or her investment performance to rival that of the experts. There’s no reason the individual investor can’t match wits with the experts, and this book will show you how.

The areas of publicity, public relations and promotions have been considered to be on the periphery of the media. Yet this revealing new book demonstrates that they form a fundamental component of the media industries, with the decline of hard news being accompanied by the rise of gossip and celebrity. In addition to making a substantial contribution to our understanding of the cultural function of celebrity, *Fame Games* outlines how the promotion industry has developed and how celebrity is produced, promoted, and traded within the Australian media. While their analysis will inform academic debates on media practice internationally, the authors have taken the unique step of investigating the workings of the Australian promotion industry from within. Interviews with over 20 publicists, promoters, agents, managers, and magazine editors have provided a wealth of information about the processes through which celebrity in Australia is produced.

Tinashe is a young Shona boy living in a small village in rural Rhodesia. The guerilla war of the late 1960s haunts the bushlands, but it only infrequently affects his quiet life; school, swimming in the river, playing with the other kids on the kopje. When his younger sister, Hazvinei, is born, Tinashe knows at once that there is something special about her. Their life in the village, once disturbed only by the occasional visits of his successful uncle and city cousin, Abel, now becomes entangled with the dual forces of the Shona spirit world and the political turmoil of the nation. As Tinashe, Hazvinei and Abel grow older, their destinies entangle in ways they never expected. Tinashe is prepared to follow his sister anywhere - but how far can he go to keep her safe when the forces threatening her are so much darker and more sinister than he suspected? Andrea Eames weaves together folklore and suspense in this compelling tale of a boy struggling to do the right thing in an unpredictable world.

This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) – from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies. In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

A warm, gorgeous exploration of a little girl's experience immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. Sakura's Cherry Blossoms captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

Game Theory with Applications to Economics Routledge Drawing on examples from current economic literature and politics, this is the first book on game theory at an introductory, but not elementary, level. The author covers topics of great actual or potential use in economics, such as noncooperative games, infinitely repeated games, finitely repeated games, two-person cooperative games, and cooperative games with and without side payments. Thoroughly revised, the new second edition of this authoritative book includes greatly expanded coverage of equilibrium refinements, and the "folk theorem" for repeated games as well as a new chapter on finite noncooperative games.

In 2010, the Latin American and Caribbean region showed great resilience to the international financial crisis and became the world region with the fastest-growing flows of both inward and outward foreign direct investment (FDI). The upswing in FDI in the region has occurred in a context in which developing countries in general have taken on a greater share in both inward and outward FDI flows. This briefing paper is divided

into five sections. The first offers a regional overview of FDI in 2010. The second examines FDI trends in Central America, Panama and the Dominican Republic. The third describes the presence China is beginning to build up as an investor in the region. Lastly, the fourth and fifth sections analyze the main foreign investments and business strategies in the telecommunications and software sectors, respectively.
