'A triumph' INDEPENDENT 'A thought-provoking and indispensable book' DAILY MAIL 'An instant classic ... I have been reading it with unalloyed admiration and delight' EVENING STANDARD Roy Strong has written an exemplary introduction to the history of Britain, as first designated by the Romans. It is a

brilliant and balanced account of successive ages bound together by a compelling narrative which answers the questions: 'Where do we come from?' and 'Where are we going?' Beginning with the earliest recorded Celtic times, and ending with the present day of Brexit Britain, it is a remarkable achievement. With his passion, enthusiasm and wide-ranging knowledge, he is the ideal narrator. His book should be read by anyone, anywhere, who cares about Britain's national past, national identity and national prospects.

Negotiations, 1972-1990 Atlantic Books Ltd
Diego is a forty-something car salesman with a talent for telling half-truths. Fausto sells watches over the phone. Claudio manages (barely) his family-owned neighborhood supermarket. The characteristic common to each of these three men is their abject mediocrity. Yet, mediocrity being the mother of outrageous invention, they embark on a project that would be too ambitious in scope for any single one of them, let alone all three together. They decide to flee the city and to open a rustic holiday farmhouse in the Italian countryside outside Naples. Things would have been challenging enough for these three unlikely entrepreneurs, but when a local mobster arrives and demands they pay him protection money things go from bad to worse. Now their ordinary (if wrongheaded) attempt to run a small business in an area that organized crime syndicates consider their own becomes a quixotic act of defiance.

Guide to the International Registration of Marks under the Madrid Agreement and the Madrid Protocol Columbia University Press

This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) - from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed,

developed, and evaluated while exchanging and processing critical health information.

Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

Drawing on examples from current economic literature and politics, this is the first book on game theory at an introductory, but not elementary, level. The author covers topics of great actual or potential use in economics, such as noncooperative games, infinitely repeated games, finitely repeated games, two-person cooperative games, and cooperative games with and without side payments. Thoroughly revised, the new second edition of this authoritative book includes greatly expanded coverage of equilibrium refinements, and the "folk theorem" for repeated games as well as a new chapter on finite noncooperative games.

Sakura's Cherry Blossoms Springer Nature

In order to understand architecture in all its cultural complexity it is necessary to grasp such basic concepts as representation, form and space. The aim of this book is to provide teachers, students, practising architects and general readers with a set of ideas that will enrich their conversation, their writing, and above all their thinking about architecture. The book is divided into eight chapters, each covering a particular aspect of architecture, and introduces difficult concepts gradually. Architectural theorists and philosophers are mentioned in passing and their works are listed in the bibliography, but they are not the subject of the book. Architecture, rather than philosophy, is at the centre of the picture. The aim is to enable the reader to understand architecture in all its aspects, rather than to learn the names of particular theorists. Written in a conversational style, *Thinking about Architecture* is an invaluable and accessible standard introduction to architectural theory.
