Redefining Scientific Thinking for Higher Education Chambers Harrap Pub Limited

"The stories are skillfully told and entirely entertaining . . . An expert, mostly feel-good book about modern medicine" from the award-winning author (Kirkus Reviews, starred review). Behind every landmark drug is a story. It could be an

oddball researcher's genius insight, a catalyzing moment in geopolitical history, a new breakthrough technology, or an unexpected but welcome side effect discovered during clinical trials. Piece together these stories, as Thomas Hager does in this remarkable, century-spanning history, and you can trace the evolution of our culture and the practice of medicine. Beginning with opium, the "joy plant," which has been used for 10,000 years, Hager tells a captivating story of medicine. His subjects include the largely forgotten female pioneer who introduced smallpox inoculation to Britain, the infamous knockout drops, the first antibiotic, which saved countless lives, the first antipsychotic, which helped empty public mental hospitals, Viagra, statins, and the new frontier of monoclonal antibodies. This is a deep, wide-ranging, and wildly entertaining book. "[An] absorbing new book." –The New York Times Book Review "[A] well-written and engaging chronicle." –The Wall Street Journal "Lucidly informative and compulsively readable." –Publishers Weekly "Entertaining [and] insightful." –Booklist "Well-written, well-researched and

fascinating to read Ten Drugs provides an insightful look at how drugs have shaped modern medical practices. Towards the end of the book Hager writes that he 'came away surprised by some of the things he had learned.' I had the very same reaction." –Penny Le Couteur, coauthor of Napoleon's Buttons: How 17 Molecules Changed History A History of Politics Simon and Schuster Scalia Dissents Simon and Schuster **A History of the Roman People** Bloomsbury Publishing The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas. A Summer Life Penguin Five great poets of the T'ang dynasty (eighth and ninth centuries A.D.) are represented in this collection: Wang Wei, Li Po, Tu Fu, Li Ho, and Li Shang-Yin. Each poet is introduced by the translator and represented by a selection that spans the poet's development and career. These constitute some of the greatest lyric poems ever written. **PHP & MySQL: The Missing Manual** NTS Press

With body piercing and tattooing becoming more popular and mainstream, many teens may think about engaging in these forms of body modification. An excellent resource for young people pondering a piercing or tattoo, this title presents some of the pros and cons they should consider. In an honest and engaging manner, the author presents important information teens need to protect their health, including how to identify a reputable studio, what to expect from the procedures, and how to do proper aftercare. Legal, social, and familial issues are explored, too, including the importance of discussing the decision with their parents and choosing tattoos or piercings they can live with throughout adulthood.

The word 'philavery' was specially invented to describe this book - a collection of words chosen simply on the grounds of their aesthetic appeal. Some of these words appeal because of their aptness, some for their obscurity, some for their euphony, and some for their quirkiness. As a collection they will be a delight to all word lovers.

The Increment: A Novel Haynes Publishing

This book examines the learning and development process of students' scientific thinking skills. Universities should prepare students to be able to make judgements in their working lives based on scientific evidence. However, an understanding of how these thinking skills can be developed is limited. This book introduces a new broad theory of scientific thinking for higher education; in doing so, redefining higher-order thinking abilities as scientific thinking skills. This includes critical thinking and understanding the basics of science, epistemic maturity, research and evidence-based reasoning skills and contextual understanding. The editors and contributors discuss how this concept can be redefined, as well as the challenges educators and students may face when attempting to teach and learn these skills. This edited collection will be of interest to students and scholars of student scientific skills and higher-order thinking abilities.

Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "splotted with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things.

In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding

variety of fronts on which the German Army fought – from the women. She was an active abolitionist, associated with North African desert to the Russian steppe – prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent. In the period from September 1939 to May 1945.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave

Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
