Since the popularisation of the internet, low-income Brazilians have received little government support to help them access it. In response, they have largely self-financed their digital migration. Internet caf  s became prosperous businesses in working-class neighbourhoods and rural

settlements, and, more recently, families have aspired to buy their own home computer with hire purchase agreements. As low-income Brazilians began to access popular social media sites in the mid-2000s, affluent Brazilians ridiculed their limited technological skills, different tastes and poor schooling, but this did not deter them from expanding their online presence. This book examines a selection of plays from four innovative women playwrights of the first two decades of 21st century Spain. By foregrounding female characters as the subjects and protagonists of their plays, Mar G ómez Glez, Carolina África, Luc ía Miranda, and Marta Buchaca reinscribe the stage as a

space for the productive exploration of female autonomy and individuation. This book further investigates the use the platform of the theatre and the expressive possibilities therein to portray the realities of gendered oppression and efforts to define subjectivity within a social context where confining patriarchal and dominant cultural conditions place severe strictures on women ' s open search and development of selfhood

and identity. The diversity of genres deployed in their respective approaches, spanning the subversion of realist conventions, the framework of historical drama, the communal potentialities of forum theatre, and experiential site-specific production, point to important innovations in contemporary stagecraft and performance.
